Windows 365 - Windows 11 on Cloud

- Windows 365 is a subscription service that allows you to create and run PCs remotely. It's something of a hybrid between a virtual machine and Microsoft Remote Desktop; it is a Cloud PC.
- Windows 365 allows you to create Cloud PCs that run either on Windows 10 or Windows 11 if it's available. Even if you don't have Windows 11 or 10, you can still run your PCs on cloud without any hardware prerequisites.
- As a manager, you don't need to send devices to people working remotely because they can just access their PC from whatever machine they have at hand. Choosing between Windows 11/ Windows 10 and Windows 365 is entirely based on your needs.
- For businesses, choosing between Business and Enterprise plans is dependent on number of employees and how much you value mobility and hybrid work.

Embee - Microsoft Gold & FastTrack Partner

Top Microsoft Business Partner in India to Accelerate Your Journey Towards Modernizing Workplace with Windows 365

As a Microsoft Gold and FastTrack partner, we offer Windows 365 solutions at never seen before prices. Create your own remote digital workspaces to scale and grow with Embee.
