

Azure Virtual Desktop (AVD) Implementation

Deploy and scale your virtualized Windows desktops and applications on Azure by leveraging the power of AVD.

Leave behind the on-premises infrastructure that required constant management of pools of virtual servers to serve the desktops and applications to your users. Spend more time on the desktops and applications that streamline your business and enable your workforce to be productive from anywhere on any device. Emergent Software will help with initial design and planning of your AVD needs and be with you from Proof-of-Concept (POC) testing to full scale production rollout and support.

By leveraging AVD, you benefit from the scalability, flexibility, and security abilities of a global cloud—all in a consumption-based operating expense model.

Who is Emergent Software

Digital & App Innovation

Infrastructure
Modern Work

20+ Years

Of consulting across the Microsoft ecosystem

50+ Certifications

In Microsoft and other partner solutions

100+ Clients

Actively engaged across the nation

What we do

Why work with us

Trusted Long-Term Partner

Our goal is to be a trusted extension of your team, delivering successful projects for years to come.

Solutions Oriented Approach

We're focused on solutions, not products; prioritizing long-term value through quality-driven delivery.

Flexible Engagement Options

We offer pro and managed services, allowing you to engage a full team on a turn-key project or enhance your existing team with one of our specialists.

Enable Your Workforce from Anywhere with AVD

Enhance Cost Efficiency

Use only the resources that you need when you need them.

Strengthen Your Security

AVD keeps your data in your cloud environment and off insecure endpoints.

Streamline Disaster Recovery

Azure's cloud infrastructure provides an efficient disaster recovery process.

Benefits of Azure Virtual Desktop

Achieve Scalability

Easily scale VMs up and down based on business requirements.

Licensing Advantages

Leverage existing Microsoft 365 licenses for AVD to reduce costs.

Flexibility for Remote Work

Empower your users to work from anywhere on any device.

Optimized for Teams and Office

AVD is optimized for the applications your users know and love.

Additional Benefits

Simplify Management

AVD remote desktop services make management easier.

Azure Integrations

AVD integrates seamlessly with other Azure services.

High Availability

Users can access their virtual desktops anytime without disruption.

Transition Smoothly

Easily shift from Citrix or Horizon Desktop to a cloud-native approach.

Follow the Cloud Adoption Framework

1. Discovery & Assessment
2. Solution Design
3. Landing Zone Setup
4. Testing and Validation
5. VM Replication & Migration
6. Handoff & Closure
