# Emergent's Approach To: Data Security Workshops

## Challenge

Organizations lack clear visibility into where sensitive data lives, how it is shared, and how AI and insider behavior increase security, privacy, and compliance risk across Microsoft 365.

## Solution

Emergent delivers a Data Security Workshop using Microsoft Azure and Purview to discover sensitive data, assess risk, analyze behavior, and translate findings into clear, prioritized actions

## Outcome

IT leaders gain executive ready insight into data risk, a prioritized remediation roadmap, and confidence to reduce exposure, strengthen governance, and enable secure AI adoption.

# Additional Benefits

## Executive Risk Clarity

Turn complex Microsoft security signals into clear, prioritized risks and actions.

01

## Microsoft-Led Security

Uncover sensitive data exposure using tools aligned to Microsoft best practices.

02

## AI Risk Readiness

Identify and reduce data leakage risks that can block secure adoption of AI initiatives.

03

## Hidden Data Exposure

Surface dark organizational data, oversharing, and risky storage locations that often go unnoticed.

04

# Additional Benefits
