

Microsoft Fabric Assessment

Emergent Software's Microsoft Fabric Assessment evaluates your current data warehouse assets, identifying opportunities for optimization and modernization using Microsoft Fabric. The assessment improves data flow, enhances models, and aligns architecture with Fabric's capabilities, driving data-driven decisions and cost efficiency.

Who is Emergent Software

Digital & App Innovation
Data & AI
Infrastructure
Modern Work
Security

20+ Years

Of consulting across the Microsoft ecosystem

50+ Certifications

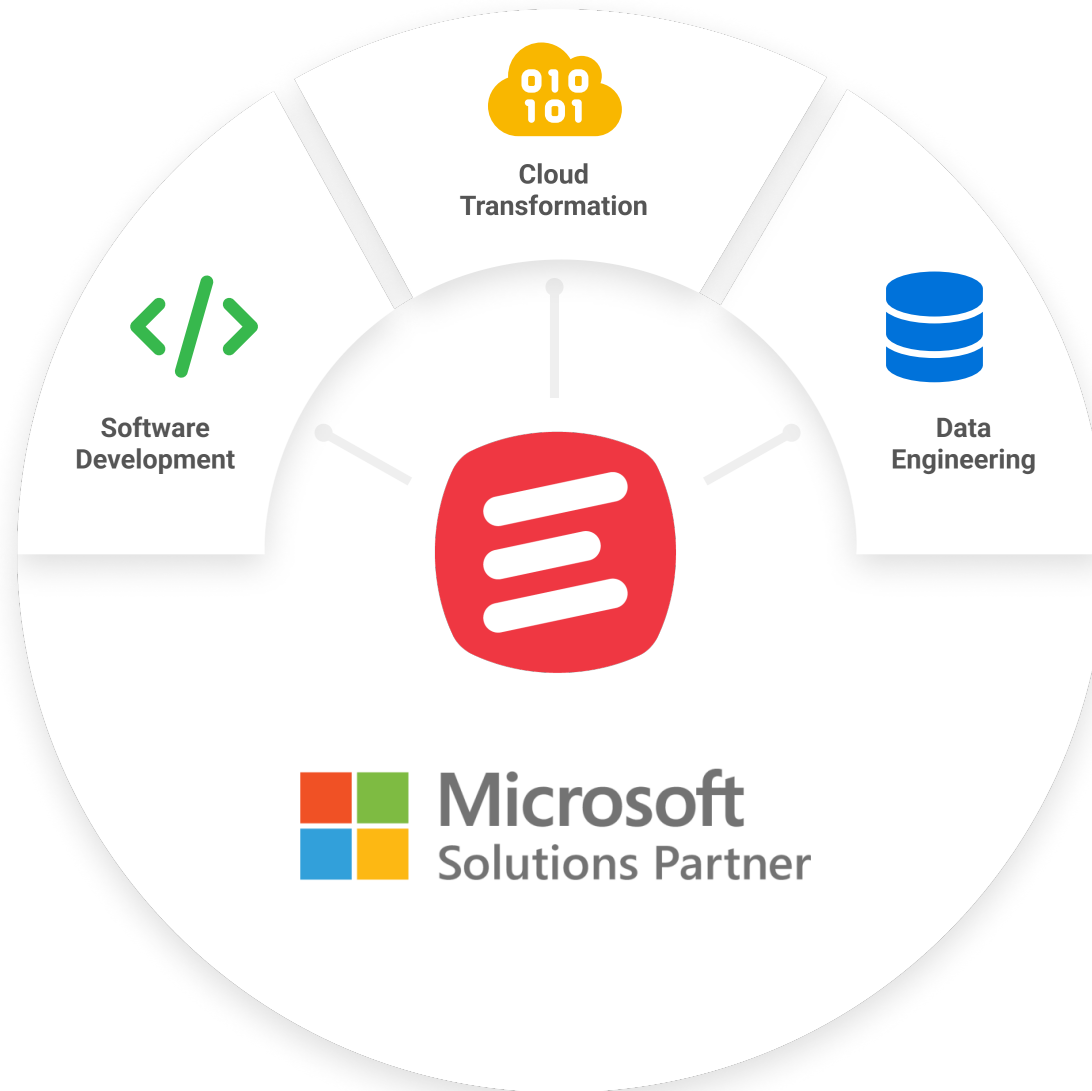

In Microsoft and other partner solutions

100+ Clients

Actively engaged across the nation

What we do

Why work with us

Trusted Long-Term Partner

Our goal is to be a trusted extension of your team, delivering successful projects for years to come.

Solutions Oriented Approach

We're focused on solutions, not products; prioritizing long-term value through quality-driven delivery.

Flexible Engagement Options

We offer pro and managed services, allowing you to engage a full team on a turn-key project or enhance your existing team with one of our specialists.

Why Perform a Microsoft Fabric Assessment?

Data-Driven Decisions

Enhance the accuracy, timeliness, and usability of your data platform, enabling more informed business decisions.

Cost Effectiveness

Consolidate analytic tools and platforms, reducing cost and preventing tool sprawl through Microsoft Fabric's unified platform consumed in a simplified CapEx model.

Single Source of Truth

Leverage OneLake as the centralized data repository, ensuring data consistency and eliminate the duplication of data sets.

Benefits of our Microsoft Fabric Assessment

Optimized Data Flow

Enhance existing data pipelines to eliminate bottlenecks and improve accessibility for efficient data use.

Modernized Architecture

Leverage Fabric's architecture for scalability, adaptability, and alignment with your evolving business goals.

Cost-Effective Insights

Gain insights into optimizing analytics spending with consumption-based pricing that prevents tool sprawl.

AI-Ready Data Models

Prepare data models for AI by centralizing and structuring assets for future-ready, predictive insights.

Benefits of our Microsoft Fabric Assessment

Single Source of Truth

OneLake centralizes data, ensuring consistency and eliminating redundancies across analytics functions.

Enhanced Productivity

Equip data teams with Fabric's tailored interfaces, streamlining workflows and improving output.

Strengthened Security

Integrate Entra ID & Purview and apply RBAC policies to safeguard data access and meet compliance needs.

Actionable Recommendations

We'll deliver a prioritized backlog, guiding your next steps in modernizing and optimizing data assets.

Emergent's Microsoft Fabric Assessment Includes:

- Evaluation of existing data flows and movement patterns
- Assessment of current data models and reporting structures
- Identification of performance gaps and bottlenecks
- Documentation of data sources and connectivity within Fabric
- Document existing reporting, noting primary audiences and domain spaces.
- Analysis of cost efficiency and tool consolidation opportunities
- Recommendations for AI-readiness and data model enhancements
- Integration review for OneLake as the central data repository
- Review opportunities for integration points for Entra ID, Purview, and role-based access policies
- Creation of a prioritized backlog for modernization steps
