Microsoft Fabric Assessment

Emergent's specialized Microsoft Fabric Assessment is the essential first step for organizations with an existing data warehouse or similar assets, aiming to transition to Microsoft Fabric.

Our assessment will empower your organization to fully leverage your data assets by modernizing architecture, optimizing data flows, and consolidating sources within Microsoft Fabric. Our experts will identify performance gaps and recommend tailored solutions that drive data-driven decisions, streamline costs, and prepare your platform for advanced analytics and AI integration—all with a focus on security and governance.

Optimized Data Flow

Enhance existing data pipelines to eliminate bottlenecks and improve accessibility for efficient data use.

Modernized Architecture

Leverage Fabric's architecture for scalability, adaptability, and alignment with your evolving business goals.

Cost-Effective Insights

Gain insights into optimizing analytics spending with consumption-based pricing that prevents tool sprawl.

AI-Ready Data Models

Prepare data models for AI by centralizing and structuring assets for future-ready, predictive insights.
