

A hand holding a smartphone is shown in a light, semi-transparent style. Overlaid on the phone and the background is a network diagram consisting of white dots connected by thin white lines. A white cloud icon is positioned in the center of the network. The background is a light gray with a subtle grid pattern and some bokeh light effects.

**CLOUD  
ASSESSMENT  
FRAMEWORK**

## DIGITAL TRANSFORMATION

Organizations have embraced digital technologies across the enterprise IT landscape to drive innovation, further scale and broaden profit lines. The migration to all things Cloud has taken hold as a primary strategy to achieve operational excellence and business transformation. The biggest challenge is how organizations can adapt their legacy IT architecture and applications to be Cloud-enabled.

Gartner's findings in "Forecast: Cloud Consulting and Implementation Services, Worldwide, 2017-2022" highlight a key aspect about cloud adoption - "Organizations increasingly recognize that "cloud" is not the goal, but an enabler to support their digital business transformation". IT and business leaders are embracing cloud and looking for opportunities for how cloud can be utilized optimally as part of their overall IT stack across the organization. At Emtec Inc., we provide a holistic approach to help organizations embrace the benefits that Cloud brings to their IT landscape. Our effective and proven cloud assessment framework helps position client's Cloud initiatives for success.

## CLOUD ASSESSMENT FRAMEWORK

Emtec's comprehensive assessment model for cloud adoption provides a tangible roadmap for organizations to help them traverse the decision-making process for cloud initiatives.

Emtec consultants leverage the Cloud Migration Point, an accelerated technique that helps determine the approximate scale of effort and cost required to move an application or technical platform to cloud.

As seen in the graphic, Emtec evaluates both business processes and technology infrastructure to assess current investments and identify potential areas which are ripe for successful cloud migration and adoption.

**“BY 2020, A CORPORATE  
"NO-CLOUD" POLICY WILL BE  
AS RARE AS A "NO-INTERNET"  
POLICY IS TODAY.”**

## **START YOUR JOURNEY TO THE CLOUD**

If you are interested in getting started but unsure where to begin, Emtec can help. Contact us for your [complementary cloud assessment](#) today.
