eGroup | ENABLING TECHNOLOGIES

together we make IT happen

ELEVATE YOUR EFFICIENCY, INNOVATION, AND MODERNIZATION USING MICROSOFT POWER PLATFORM

with an eGroup Enabling Technologies Apps & Automation Design Sprint

Enhance your efficiency by integrating new applications and automation into your existing business processes and let workers perform their tasks with greater speed and accuracy, saving you money and improving quality along the way. Reinvent your processes with one of our "Process Optimization" solutions and integrate Power Platform solutions to transform your business and improve the quality of output. Stay modern by retiring old and unsupported tools and infrastructure, replacing them with streamlined and easier-to-maintain solutions.
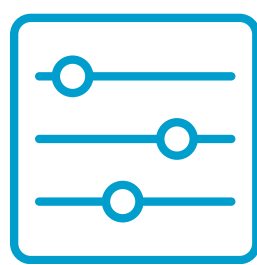

The Microsoft Power Platform offers rich and powerful solutions through Power Apps and Power Automate. It can be overwhelming to start the journey of implementing these solutions. Our team will partner with your key business decision-makers to enable Process Excellence and add value at work with strategic improvements.

APPS & AUTOMATION DESIGN SPRINT OVERVIEW

DAY ONE
- Perform a high-level, end-to-end data needs walkthrough.
- Identify all systems/applications and data in current solution (if applicable).

DAY TWO
- Finish the discovery process.

DAY THREE
- Start documenting a detailed Power Platform solution architecture diagram (data sources, process steps, application integrations). Applying AI will be considered for all solutions.
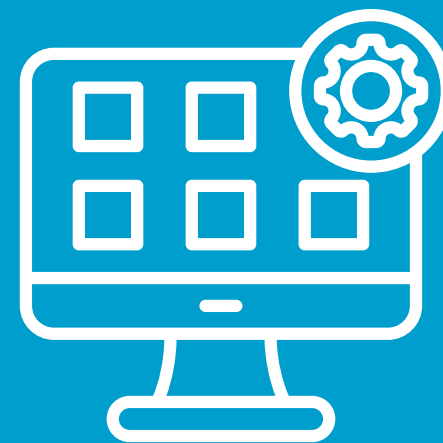

DAY FOUR
- Finish creating the Power Platform solution architecture and document high-level implementation plan (resources, effort, cost and timeline).

DAY FIVE
- Review the solution and implementation plan with you and adjust as needed.
- Discuss timing for moving to implementation phase.

THE POWER PLATFORM CAN LEAD TO A 45% REDUCTION IN APPLICATION DEVELOPMENT COSTS
