

BE PROACTIVE AND PREPARE YOUR IT TEAM FOR THE INEVITABLE WITH A DISASTER PLAN

with eGroup Enabling Technologies Incident Response Tabletop Exercise

Every IT organization should have an Incident Response Plan (IRP). It is intended as a guide for IT staff to use in the event that the organization suffers any disaster described in the plan.

The [National Institute of Standards and Technology \(NIST\)](#) recommends and provides guidance on how to conduct an IRP Tabletop Review. NIST Special Publication 800-84 outlines the importance of tabletop exercises to ensure the organization has considered threats to business continuity. The exercise can also reveal the extent to which the IT team understands how they should respond to different kinds of threats and incidents.

Expert-Led, NIST-Based Approach

RUN BY PROS

Conducted by former IT executives with real-world experience

BASED ON NIST

Based on NIST 800-84 Guidelines

TAILORED TO YOU

Tailored to your specific industry and threat landscape

Incident Response Plan Overview

DELIVERABLES

- Comprehensive After-Action Report
- Scoring Scale to Benchmark Your Readiness
- Actionable Recommendations to Address Identified Gaps

TANGIBLE BENEFITS

- Improved Incident Response Capabilities
- Enhanced Staff Training and Awareness
- Stronger Compliance Posture
- Potential Reduction in Cyber Insurance Premiums

"Not only did you help us craft a modern-day incident response plan, but we also rolled that straight into tabletop exercises. That helped us really feel way more prepared and allows us to check the boxes in client risk assessments and insurance questionnaires."

- Marcus Lenaro, Herrick Law Firm
