

Cloud Services

Accelerating innovation cycles powered by public, private & hybrid cloud

There is an ever-increasing demand for solutions delivered via the Cloud. We help design your Cloud architecture, selecting the right stack (Azure) to meet your future needs, and both migrating on-premise applications as well as developing Cloud-native applications. No matter where you are in your cloud journey, we can help your business unleash the power of the cloud.

Encora's Technical Center of Excellence: Cloud

- Engineer resilient, secure & high-performance multi-cloud architectures
- Establish cloud enablement strategy and technical Cloud center of excellence
- Create automation to manage multi-cloud ecosystems & accelerate time to market
- Implement data fabric to overcome siloes & attain analytics competency
- Develop cloud-native applications with inherent application mobility

Use Cases

- Cloud automation to execute workflows & everything-as-code
- Data modernization strategy including consolidation, storage, analytics & modeling
- Frictionless, agile, personalized, omnichannel experience design for customers
- DevSecOps to integrate security into Cloud services
- Service mesh to enable microservices at scale

Expert Profile

Manuel Cubillo

Innovation Leader, Cloud Services

“Cloud adoption continues to grow, and all indicators show this trend to be accelerating. However, being “in the cloud” is not as important as really leveraging its capabilities and benefits to your business. A cloud enablement strategy is key for the evolution and competitiveness of any organization, not only to enable technology teams be more efficient and cost effective but as a way for the business to scale up and meet their strategic goal at all levels.”

Client Testimonial

Encora actually creates purpose-built teams just for us. It's a true team alignment. WHERE we need to move quickly, we know we can count on them. I regularly recommend them.

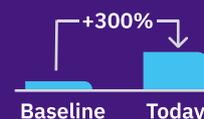

Brad Roldan

VP, SaaS Products, Bandwidth

Client Impacts Telecom Client

Encora's methodology enabled the company's move into a new high-growth market and business model. The new, highly secure and scalable platform, along with a more mature DevOps model, allowed for zero downtime deployments and an accelerated time-to-market, earning the client the reputation for excellent service quality.
