Dynamics GP to Dynamics 365 Business Central Transition Offer

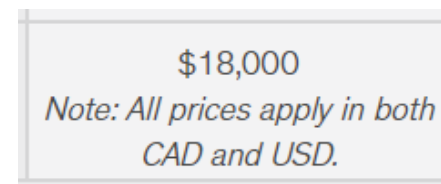

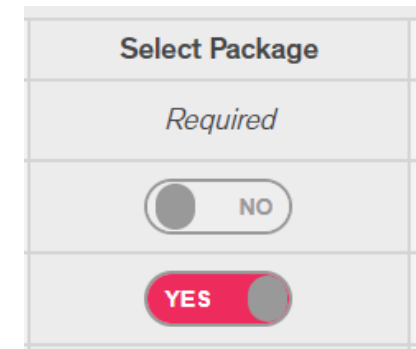

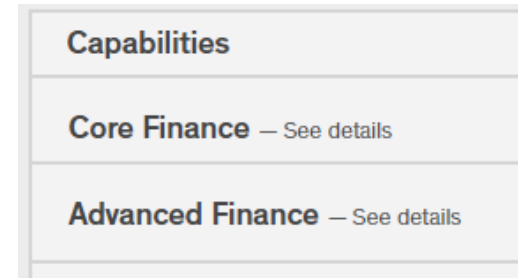

Customize a fixed price transition package using our price calculator

What is Encore's Price Calculator?

- A tool that allows users to customize a fixed price transition package by selecting the capabilities users want in Dynamics 365 Business Central when transitioning from Dynamics GP

How to use the Price Calculator?

- Expand each of the capabilities section to learn what is included in each package by clicking “See details”
- Select the capabilities that your organization needs in an ERP by toggling the buttons between “yes” and “no”
- See a total fixed price at the bottom of the calculator

**What Capabilities Are Available
to Select in the Price Calculator?**

Capabilities	<i>Note: All prices apply in both CAD and USD</i>	Price
Core Finance - setup for one company, permissions and role setup for 10 users, general ledger, dimensions, accounts payable, accounts receivable, three bank reconciliations (not eBank Rec), three bank accounts, report layout customizations for sales invoice and one cheque format, and migration of data for chart of accounts, customer master, vendor master, and open balance.		\$16,000 <i>(Required)</i>
Advanced Finance - additional 1 to 3 functional companies, intercompany transaction setup, one consolidation, and same chart of accounts and dimensions for all companies. Up to 6 functional companies available.		\$6,500
Excel Integration – configure integration from an Excel template, 3 Excel templates with 20 columns max., training for how to adjust and run the integration, and manual execution of the integration (not automatic scheduling). Ex: monthly payroll entries, sales invoices, AP invoices.		\$2,500
Multicurrency - multicurrency setup, one additional bank reconciliation (not eBank Rec), one additional bank account, up to 10 currencies, download currency exchange rates, and Bank of Canada noon rate setup.		\$2,000
Advanced Banking - EFT/ACH (accounts payable only), 80 Byte file format, and eBank Rec.		\$2,500
Fixed Assets - two depreciation books, seven asset categories, depreciation methods (straight-line and declining). Additional companies are \$750 per company.		\$3,000
Sales - sales order processing, quotes, orders, returns, and out of the box report setup including sales quote, sales order, and sales return order report.		\$3,000
Purchasing - purchase order processing, quotes, orders, returns, and out of the box report setup including purchase quote, purchase order confirmation, and purchase return order report. Set up one purchase workflow (purchase order approval or purchase invoice approval) with two levels of hierarchy, documentation and training to configure more advanced workflow approval matrix.		\$2,200
Inventory <i>(Requires sales and purchasing)</i> - set up inventory module, set up unit of measures, five locations, import items, import open balances, cycle count, and landed cost.		\$3,500
Advanced Inventory <i>(Requires sales, purchasing, and inventory)</i> – serialized tracing, lot tracking, price levels for items, bins by location, import open serial/lot balances.		\$3,500
Assemblies <i>(Requires sales, purchasing, inventory, and advanced inventory)</i> - assembly BOMS and assembly orders.		\$3,500

Why a Price Calculator?

- Every business is different which is why we believe that every business should have flexibility and choice when it comes to selecting the capabilities they need in their Dynamics 365 Business Central transition package.
- This will ensure your solution is implemented as efficiently as possible and will get your business up and running with Business Central in a timely and non disruptive manner.

Deliverables

- An analysis of the Chart of Accounts
- Set-up
- Training
- Go-live for each of the capabilities package selected
- 8 hours of go-live support

Next Steps

Try the [price calculator](#) to build out a fixed price transition package!

If you're unsure of the capabilities you need in Dynamics 365 Business Central, please [contact us](#).
