ENERGY TIME | **Microsoft Security Services implementation**

Microsoft Security helps protect people and data against cyberthreats to give you sustainable and solid security system. With our consulting and implementation services you can enhance and develop your Infrastructure.

Project Plan:

1. Pre-engagement Call

2. Assessment of current IT-infrastructure

3. Identify core Vulnerabilities and Flaws in your System

4. Consult you with the appropriate Microsoft Security solution :

    - Identity Protection

    - Endpoint Management & Protection

    - Information Protection & Governance

4. Calculate the optimal licensing plan for the deployment, enhancement and support of the selected solution

5. Implement Microsoft Security services into your Infrastructure

6. Monitoring and control of the system

7. Learn and adapt your employee to manage the system

We leverage all our deep experience in Microsoft security services in Project: Microsoft Sentinel, Azure ARC, Microsoft defender for cloud, M365 defender, Microsoft defender for endpoint, Microsoft defender for identity, defender for O365, defender for cloud Apps, Microsoft defender Threat Inelegance, Microsoft Defender external attack surface management, Microsoft Entra permission management, Microsoft Entra.
