

enform

carbon management made easy

Where is the market heading?

Environmental tendency: Companies must consider the importance of environmental and climatic factors in their operations.

Carbon Neutrality

Commitment: Companies are setting goals to reduce their carbon emissions and become carbon neutral.

Pressure for changes: According to a research by PwC Consumer Intelligence, 76% of consumers abandon companies that neglect their environmental duties, employees or the communities they operate in.

Zero Waste: The industry is seeking to reduce waste production and adopting measures to achieve the goal of zero waste.

(!) Legislation is constantly changing

- ✓ Legislation on climate-related issues is constantly changing, and companies need to stay vigilant about these changes.
- ✓ Environmental regulations are becoming increasingly stringent, and companies that don't adapt are at risk of facing financial penalties and damage to their reputation.
- ✓ It's essential for companies to monitor relevant regulations and implement the policies and practices necessary to comply with the laws and promote sustainability in their businesses.

How can Enform help you?

Enform offers various solutions to help you comply with greenhouse gas emissions regulations, including the development of greenhouse gas inventory.

Greenhouse Gas Emissions Inventory
in accordance with ISO 14064
Standard

What are the advantages of compiling your inventory?

Competitiveness

Opening up to new markets, participating in regional, global programs, and major bids in the market

Recognition by stakeholders

Meeting the climate requirements of major customers, investors, and partners

Increasing brand value

Adding value to the company and increasing its valuation, reinforcing sustainable branding

Risk reduction

Managing emissions with targets and indicators and reducing the risk of actions due to environmental impact

Meeting customer demands

Large companies require their suppliers to inventory GHG emissions. Magalu, Petrobras, Ambev, and ArcelorMittal already publish their scope 3 emissions

The first step towards Net Zero

Reducing emissions, saving resources, and increasing efficiency

Why choose Enform?

In compliance with ISO and GHG Protocol standards

Leaders in innovation and customer service

We deliver results alongside our customers

On time and within your budget

Proud to partner with
Microsoft for Startups
