

Digital Workplace Strategy

A digital workplace strategy defines a vision and strategic objectives, supported by key recommendations which will enable organisations to progress the targeted outcomes of a digital workplace. Engage Squared are experts in guiding organisations on their digital workplace transformation. From technology solutions that leverage Microsoft 365 and meet best practice to comprehensive change and adoption programs.

Expected outcomes

Analyse your current state and develop your vision

We'll undertake a digital maturity assessment to understand your organisations technology landscape. We'll then run a series of workshops to uncover the vision for your digital workplace and the drivers behind this.

Conduct research with your key stakeholders

We know that the technology is only half the story. Your project team will facilitate a series of stakeholder discovery sessions to gather additional context about current work practices and digital expectations from the organisation.

Develop a strategy and roadmap report

We'll begin highlighting key themes and findings, recommending areas for improvement (i.e. quick wins through to first successes and business transformation initiatives) and suggesting activities for what this could look like in practice.
