

Workplace to Viva Engage Migration

Viva Engage empowers the social layer of M365 providing a place to connect and engage with leaders, colleagues and communities right in the flow of their work.

To help you make a smooth transition, we have developed a process and tool to migrate content between Workplace by Meta and Viva Engage. Pairing this with our expertise in Enterprise Social Network adoption, we offer a comprehensive migration and adoption service that ensures increased momentum and success of your Viva Engage platform.

Expected outcomes

- ✓ An in-depth discovery that maps out your specific needs for a tailored, personalised migration approach
- ✓ A quick, seamless and secure migration from your legacy Enterprise Social Network to the Viva Engage platform
- ✓ Adoption and change management activities and support to engage your organisation and champion the benefits of Viva Engage
- ✓ A centralised platform that empowers organisations in knowledge sharing, employee experience, leadership engagement and company-wide communication

Discovery

We'll confirm the scope and validate the migration process in preparation for production migration. We'll also do a dry-run/proof-of-concept migration to test your content and ensure the process is effective with your environment.

Content migration

After discovery and planning, we'll deploy our tool to your Azure Environment - in only 30 minutes! The data never leaves your environment. We then begin migrating content from competing technologies to Viva Engage, Teams, SharePoint and OneDrive.

ACM support

We'll provide change management and training, enabling users to exploit the benefits of the new environment. You have the choice of three ACM packages to suit your specific needs.

What is the timeframe of this engagement?

8 weeks

What is the expected investment?

~\$20,000 - \$75,000

Who is this engagement suitable for?

Any organisation who currently has Workplace from Meta
