

# Power-up your cloud security competencies with our proven expert guidance

**S**ecurity is becoming the most growing concern for companies that are considering Cloud adoption. The rapid adoption of cloud services, along with an increasing number of cloud infrastructure and platform services, has created an explosion in complexity and unmanaged risk.

According to a 2019 Gartner study, nearly all successful attacks on cloud services are the result of customer misconfiguration, mismanagement and mistakes. Companies need to invest in cloud security management processes and tools to proactively and reactively identify and remediate these risks.

However, these companies do typically lack dedicated and highly skilled and full-time cloud security specialists, having to deal with unstructured, undisciplined and ad hoc security practices.

It is time you leverage on our proven technical expertise as a Managed Security Service Provider (MSSP) to assist you securing your organisation against cyberthreats, via designing tailor-made security systems to reach your optimal protection level and ensure threats do not even occur.

## Check all the boxes with our structured approach for Security Excellence

As part of our holistic security approach Enimbos offers you our Safeguard® Service, a set of three standalone but complementary services to assist you achieving an optimal protection level.

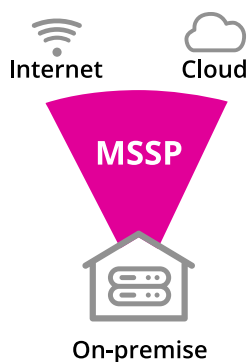

<b>Security Audit Assessment</b>	We will take you on a through analysis to: <ul style="list-style-type: none"><li>• Identify and evaluate existing IT assets</li><li>• Identify and evaluate threats associated</li><li>• Identify existing security measures</li><li>• Conduct a final assessment with an action plan</li></ul>
<b>Cloud Security Service &amp; Tool Deployment</b>	We will carry out the implementation of a portfolio of processes and services to protect and enhance security of your existing platform, considering both on-premise and cloud environments, and their connectivity
<b>NextGen 24/7 Security Management</b>	We will integrate an ongoing monitoring service, centrally controlled from our Security Operations Centre (SOC), to continuously monitor and improve your security posture and respond to security incidents.

## Enhance not only Cloud but also On-premise Security

We will assess your current situation and provide you with a wide range of solutions with top security features for both On-Premise and Cloud, so you can still have the best results for their hybrid needs.

Both on-premise and cloud resources and the connectivity between them and with the Internet need to be security ensured.

Based on your identified needs, we will assist you to successfully deploy a tailor-made portfolio of tools and services that will address your security requirements both for cloud and on-premise environments.

## Take advantage of our exclusive benefits

Enimbos is recognised as one of the ten MSSP partners worldwide. As a result, you will have access to the following specific benefits:

<b>24/7 Access to SRT</b>	You will have access to a 24/7 Shield Response Team for assistance, management and mitigation during an attack.
<b>Security Report</b>	We will send you a security report, stating all relevant security aspects and intended attacks.
<b>Global Threat Environment Dashboard</b>	You will have access to the Global threat environment dashboard, with an anonymized and sampled view of all DDoS attacks seen on our dashboards within the last 2 weeks.
<b>Protection WAF at No Additional Cost</b>	Protection of all resources with our Web Application Firewall at no additional cost.
<b>Firewall Manager</b>	Centralisation of rules at no additional cost.
<b>Cost Protection for Scaling</b>	Cost protection for scaling protects your bill against higher fees due to usage spikes from protected resources during a DDoS attack.

## Rely on our tailormade value proposition to safeguard your cloud security journey

After only four preparatory steps Enimbos will be in a position to start assisting your company towards its cloud security enhancement journey.

<b>Business Approach</b>	At the very beginning, we are presenting you our values and advanced services to consider us as your reference Managed Security Service Provider.
<b>High-level Security Assessment</b>	We will invite key security-related stakeholders to a two-hour workshop where we will jointly establish the starting point for the company.
<b>Agreement and Kick-off</b>	We will present you with the assessment results and specific recommendations. We will also provide you with a bespoke and transparent economical appraisal for the services considered.
<b>Presentation of Assessment Results</b>	We will settle the agreement for the implementation of security enhancements and we will start developing and deploying the solution agreed.

## Get a truly value-adding solution for your Cloud Security programme

We are bringing you a tested and successful approach to analyse your current security position and offer you a truly value-adding proposition to protect your Journey to the Cloud.
