

# Low Code/No Code Integration Solutions

## Business-to-business (B2B) EDI/AS2 & XML for Supply Chains

We are a team of expert B2B EDI/AS2 software developers that implement custom integration solutions that can run on cloud, on premise, mobile, desktop or in devices such as process controllers. These software applications are usually connected to data and applications from different end points such as internet of things, Microsoft Dynamics 365, SAP, Oracle, Salesforce or other ERP, CRM or MRP systems or databases. We also connect retail companies from around the world to shippers in the USA by using cloud based virtual networks and serverless technologies. We use AI, analytics, machine learning and visualization using the data collected by the applications to help improve business outcomes. We also offer managed services, including 24x7 monitoring and support of your mission critical infrastructure and applications.

### See what customers are saying:

*"We are processing hundreds of shipments daily that get entered in our WMS and Azure has been able to scale whenever necessary. The use of Logic Apps helped us go to market sooner as it provides a lot of features that make it easier to develop B2B solutions."*

*–Eugen Mui, ACB Trans Inc.*

### WHAT WE OFFER

We offer no code/low code solutions for rapidly connecting businesses and trading partners in the Logistics and Supply Chain industries. This allows our customers to rapidly integrate new customers/shippers so that they can realize revenues faster.

By using Microsoft Azure Logic Apps, we're able to provide users of our software a front-end tool that allows them to quickly onboard new customers using a drag and drop interface.

In addition, using Logic Apps 400+ connectors, we help our customers integrate with many different back-end systems. We can connect Logic Apps to cloud native apps, SAS apps or on-premise apps using Azure Data Gateway.

We have used Logic Apps to connect to WiseTech CargoWise One Warehouse Management Systems and eAdaptor RESTful interface to process purchase orders, sales orders, and item master XML files.

We build monitoring and alerting solutions with all our integrations, giving our customers peace of mind.

# Why Microsoft Azure?

## Be future-ready

Continuous innovation from Microsoft supports your development today, and your product visions for tomorrow. With 1,000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve.

Our enterprise grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data-science tools.

## Operate hybrid seamlessly

On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.

Enhance security, simplify access, and set smart policies across your different environments with a single-identity platform trusted by 90% of enterprises globally.

## Build on your terms

You have choices. With a commitment to open source and support for all languages and frameworks, build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers.

We embrace open source, drive innovation through collaboration, and contribute back to the community.

## Trust your cloud

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.

With a \$1B+ investment in security R&D and 3,500 cybersecurity experts, security is foundational for Azure.

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.
