Providing visibility into business processes for business analysts, IT operations & solutions architects

About DataTrove

DataTrove utilizes Microsoft Fabric for data integration, enabling businesses to gain deeper insights into their business processes. DataTrove aggregates structured and unstructured data into a searchable format so users can quickly see if, for example, an invoice is paid, or download a list of invoices into Excel, or documents have been received, or if purchase orders have been processed. Our primary customers include mid to large enterprises across retail, logistics, and manufacturing, to accelerate decision-making and meet/exceed business SLAs.

What we offer

- It stores data securely in an **Azure Data Lake,** enabling lightning-fast keyword search across logs, diagnostics, and historical data.

- Users benefit from **intuitive dashboards,** alerts, & detailed logs to quickly identify and resolve issues.

- Export data to Excel/CSV for further analysis and reporting.

- Built on Microsoft Fabric, it ensures scalability, automation, and secure access.

- Ideal for enterprises needing fast searches, better insights so they can improve business SLA.

What our customers are saying

"Before DataTrove, our teams spent hours pulling logs from different systems. Now with the help of Enkaytech, we resolve issues in minutes, maintain 99.98% uptime, and deliver actionable reports with a single click."

– Derek P, IT COO, PGL

Why Microsoft Azure?

Be future-ready

Continuous innovation from Microsoft supports your development today, and your product visions for tomorrow. With 1,000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve.

Our enterprise grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data-science tools

Operate hybrid seamlessly

On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.

Enhance security, simplify access, and set smart policies across your different environments with a single-identity platform trusted by 90% of enterprises globally.

Build on your terms

You have choices. With a commitment to open source and support for all languages and frameworks, build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers.

We embrace open source, drive innovation through collaboration, and contribute back to the community.

Trust your cloud

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.

With a $1B+ investment in security R&D and 3,500 cybersecurity experts, security is foundational for Azure.

Microsoft Azure

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.
