

Docs - Your team's central hub for all files, templates, and resources.

About Docs:

Docs is a document storage and knowledge management platform that uses Microsoft Azure Active Directory to secure access. It centralizes storage of all your business-critical documents (e.g. operational procedures etc.) while enabling fast search and easy collaboration among team members.

What we offer

- Centralized repository for SOPs, technical documentation, business requirements, and operational procedures.
- Fast search.
- Built for team collaboration and knowledge sharing.
- Easy document creation and management using standardized markup language.
- Version control, collaboration, and knowledge sharing across teams.
- Intelligent knowledge discovery and document summarization.
- Improves employee productivity, onboarding, compliance, and operational efficiency.
- Secure, scalable, and governed with enterprise-grade access controls.

What our customers are saying

"Docs has become our single source of truth for operational knowledge. Teams can quickly find, update, and share information, reducing onboarding time and improving collaboration across the organization."

– VP of Operations

Why Docs?

Create a Single Source of Truth

Centralize SOPs, technical documentation, business requirements, policies, and operational procedures in one secure repository.

Accelerate Employee Onboarding

Provide new hires with instant access to organizational knowledge, reducing training time and improving productivity.

Enhance Team Collaboration

Allow teams to create, update, and share documentation easily, ensuring everyone works with the latest information.

Preserve Institutional Knowledge

Capture and retain critical business knowledge, reducing the risk of information loss due to employee turnover.

Scale with Business Growth

Built on Microsoft Azure, Docs provides a secure, scalable, and enterprise-ready platform that grows with your organization.

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.
