

Turn documents into structured data your downstream systems can actually consume.

About Document Intelligence:

Document Intelligence is an AI-powered document processing solution that automatically extracts data from documents and updates back-end systems e.g. ERP, CRM, Insurance Underwriting. This helps eliminate manual data entry and improves operational efficiency.

What we offer

- Automatically processes PDFs, invoices, PODs, forms, images and business documents from email inboxes and repositories.
- Uses Azure AI Document Intelligence, and machine learning to extract key business data.
- Integrates with ERP, WMS, TMS, accounting, insurance underwriting systems and other backend systems.
- Reduces document processing time from 10–15 minutes to under 30 seconds.
- Improves data accuracy and minimizes manual entry errors.
- Automates repetitive workflows and reduces operational costs.
- Secure, scalable, and built on Microsoft Azure for enterprise-grade performance.

What our customers are saying

"Document Intelligence eliminated hours of manual data entry by automatically processing invoices and PODs. We've improved accuracy, accelerated processing times, and increased operational efficiency."

Why Document Intelligence?

Eliminate Manual Data Entry

Automatically extract and process data from invoices, PODs, PDFs, forms, and business documents, reducing repetitive administrative work.

Process Documents Faster

Reduce document processing times from 10–15 minutes to under 30 seconds, enabling faster business operations.

Improve Data Accuracy

Minimize human errors associated with manual data entry and ensure consistent, reliable data capture.

Reduce Operational Costs

Automate high-volume document workflows and reduce the need for additional headcount to manage growing workloads.

Accelerate Business Processes

Automatically update ERP, WMS, TMS, accounting, and other enterprise systems with extracted data in real time.

Enhance Customer Experience

Process documents faster, reduce delays, and improve responsiveness across business operations.

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.
