

How We Work

We assume nothing

We begin every project with a discovery phase where we ask questions - about you, your users, the market. From there, we can begin to assess the challenges and opportunities and make reliable recommendations and give you a solid delivery plan.

Faster to Market

Incremental delivery equals faster time-to-market and more value for you.

We make you part of the team

You're included in all stages of delivery, because no one knows your business better than... well, you. A representative from your organization is invited to be present for planning sessions, daily check-ins and regular show cases to make sure your interests are maintained throughout the delivery process.

Value-focused delivery

Enlighten gives you value from the very start, working with you to deliver an immediate solution. This means you can start reaping the rewards while we continue working on the full solution.

Continuous Improvement

Build small. Measure the outcome. Decide what to do next. Repeat.
