

# Time for a Health Check!

As an IT Admin in charge of Microsoft 365 & Teams, you realize that Teams adoption comes with its own set of challenges: too many teams are created, employees feel lost, and you ask yourself if everything is secure and compliant.

From customer surveys, we have learned that a typical employee will create more than 1 team. We've also found that 41% of these teams could be inactive for more than 90 days, with up to 50% of them having less than two owners. This is a big concern, even bigger when these teams include guest users.

With a Teams Health Check, our customers see strong tangible benefits such as...

- Reduce the number of teams per employee by 50%
- Half the number of harmful teams (inactive, guess access, public, etc.)
- Reduce the IT workload is spent on Teams management by more than 78%

## What is included?

A full audit of your Microsoft Teams environment from a governance perspective

A few hours after having Powell Teams installed, you will know:

- How many teams are in your tenant?
- How many potentially “harmful” teams exist?
- Teams with guest access,
- Teams with missing owners,
- Inactive teams (>90 days),
- Public teams

As part of this service, we commit to at least two 1-hour long sessions with our experts and access to Powell Teams for 14 days.

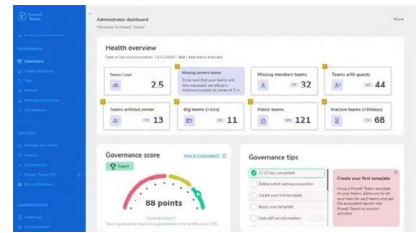

**[Get your FREE Microsoft Teams Health Check worth over \\$4000](#)**

# How does a Teams Health Check work (Typical Timeline)

## Day #1: Powell Teams App Installation

- Download the Powell Teams app from the Microsoft Teams store
- Get the trial started by having your Office 365 administrator approve the Read/Write permissions

## Day #2: First Health Check

- Access the Admin Dashboard in Powell Teams
- Understand where you are with Teams sprawl & potentially harmful teams
- Workshop #1: Talk to Enlighten's team of experts to better understand how your Teams tenant compares to other organizations and receive recommended action items

## Days #3-7: Quick Wins

- Take immediate action such as archiving inactive teams, changing teams' privacy or contacting teams' owners to fix breaches
- You should see your Governance score starting to improve
- Now you are ready to set Governance & Life cycle management automation!

## Days #8-14: Start Building a Governance Framework

- Workshop #2: define your two first templates (internal project, external project) to set Governance framework with the help of our experts
- Attach some existing teams to these templates and activate the bots to see automation in action
- Your trial is now over! Decide to keep Powell Teams to get the long-term benefits!
