Seamless Onboarding & Integrations

Our platform simplifies the onboarding of even the most complex assets, giving you full control over your data. enSights integrates easily with existing management systems, ensuring that all your data is consolidated for analysis without disruptions.

24/7 Expert Support & Cybersecurity

Backed by a dedicated team of renewable energy professionals, enSights provides continuous technical support and robust cybersecurity measures to protect your assets and data.

Scalable & Flexible Operation

Whether managing a single site or a global fleet, enSights is adaptable and scalable. Customize reports and dashboards to suit your unique operational needs as your portfolio grows.

Our Top Features

Centralized Data Management

Consolidate financial, operational, and performance data from multiple sources into a single, user-friendly dashboard.

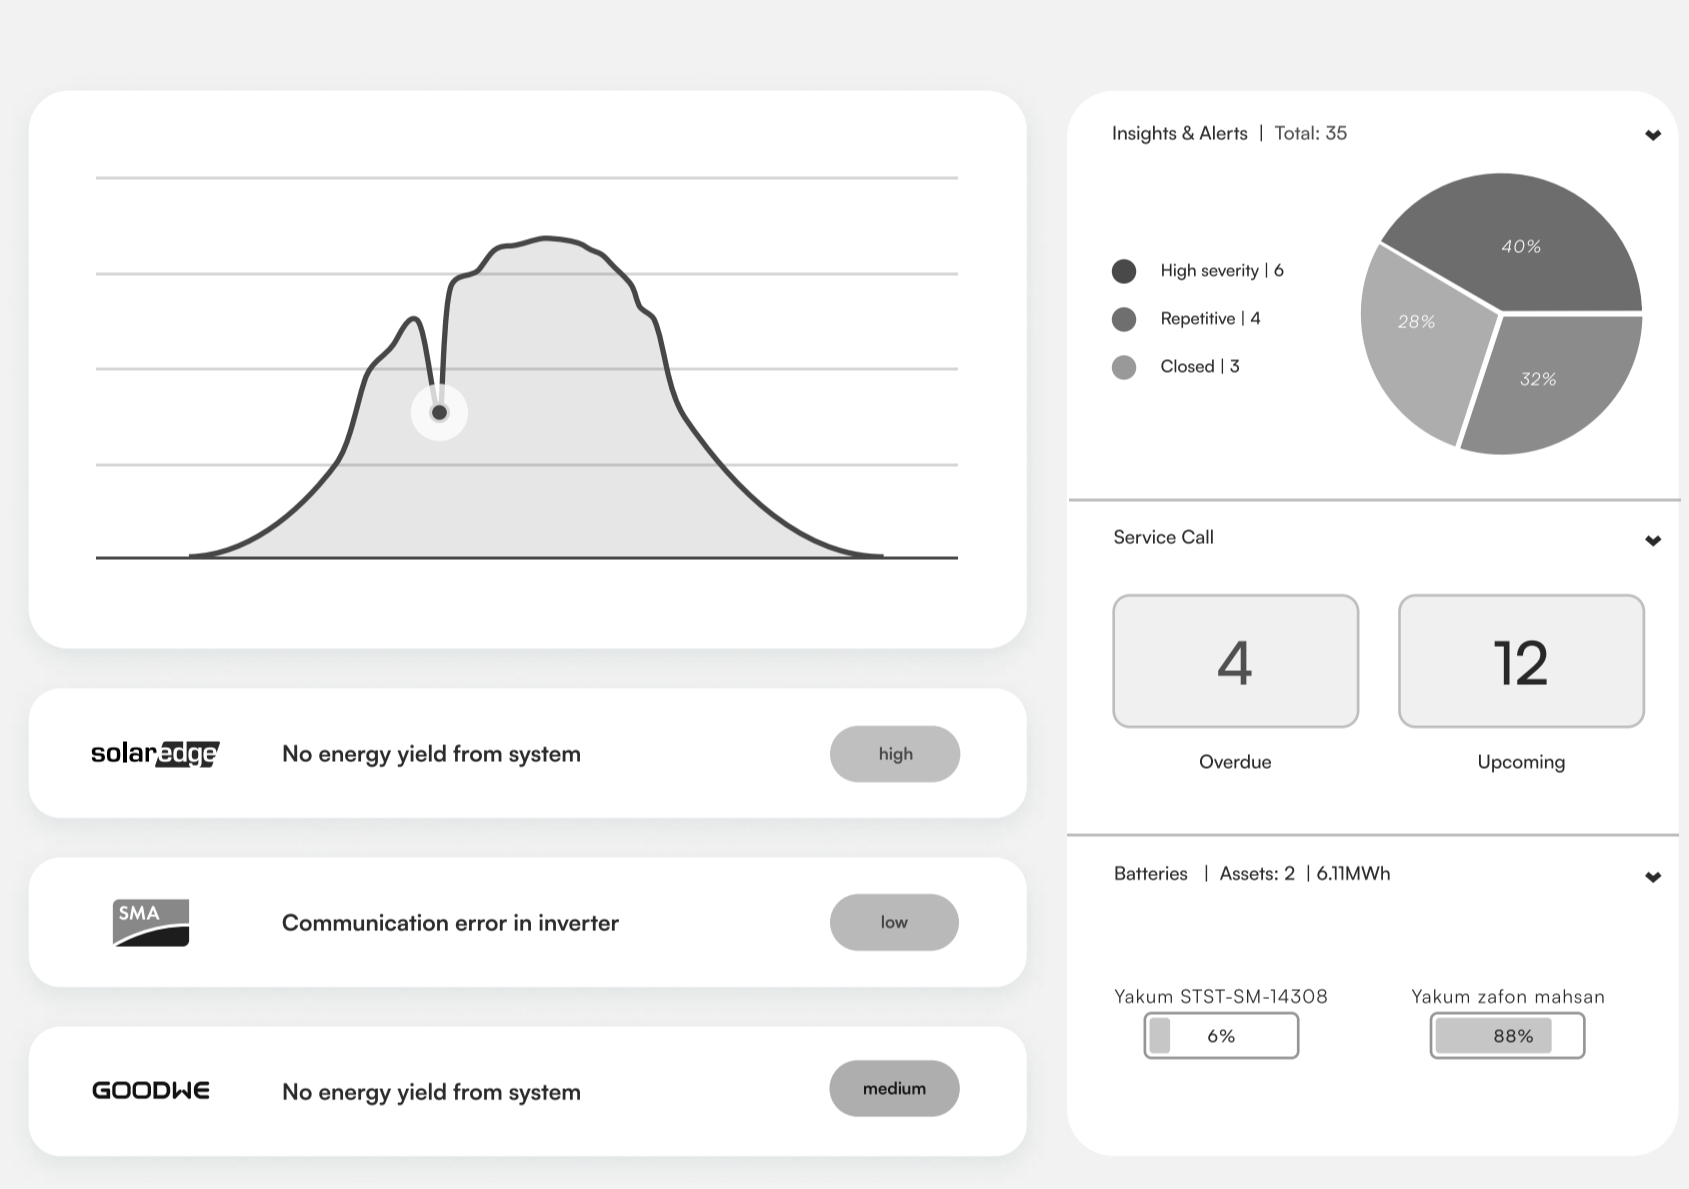

AI-Powered Performance Optimization

Our AI-driven analytics provide actionable insights to improve system performance, reduce downtime, and boost financial returns.

Monitoring & Control

Real-time monitoring with instant alerts allows for proactive maintenance and troubleshooting, optimizing asset uptime.

BESS Monitoring and Optimization

Real-time monitoring down to the cell level. Smart analysis and alerts to prevent malfunctions. Dynamic control policies to prolong battery life and maximize revenues.

Addressing Key Industry Challenges

enSights is uniquely positioned to solve the challenges that asset managers and operators face across solar, storage, and EV portfolios:

- Lack of Transparency Across DERs**: enSights offers a single platform to eliminate data silos and provide full visibility across distributed energy resources.
- Optimizing Battery Storage**: Our BESS sizing calculator helps you find the right battery solution for peak shaving, energy offset, or next-day trading.
- Difficulty in Gaining Insights**: Our platform consolidates financial, operational, and performance data, making it easy to derive actionable insights.
- O&M Cost Tracking & Financial Losses**: Track operational expenses in real-time, improving budgeting and minimizing financial risk.
- Complex Asset Onboarding**: Even challenging assets are onboarded smoothly, ensuring full data access and control from day one.
- False Positives & Data Quality**: Our AI filters false positives, ensuring data accuracy and reducing the burden of manual data checks.

Clients report up to a 7% increase in asset uptime, and up to 60% improvement in operational efficiency thanks to enSights' proactive monitoring and AI-driven analytics.
