Microsoft Azure solutions with Ensono

A unique approach that allows your organization
to benefit from cloud in no time.

ensono®

OPERATE FOR TODAY.
OPTIMIZE FOR TOMORROW.

To optimize for tomorrow, start thinking about Azure today

While digital transformation has left many organizations wondering which workloads they need to modernize first, the real challenge actually lies in finding a partner that will tailor solutions to match your business strategy and ambitions.

At Ensono we help our clients to future proof-through Microsoft Azure.

To optimize for tomorrow, start thinking about Azure today

Boost worker productivity

- Enhance operations with the flexibility and convenience of the cloud

- Tap into Azure Marketplace tools

Improve operational efficiency

- Remove administration requirements to free up IT resources

- Re-evaluate your environments

- Optimize your infrastructure

Secure your systems

- Remove the security risks posed by complex operations

- Access a secure cloud foundation

- Reduce vulnerabilities in application and desktop delivery

Reduce costs

- Only pay for the resources used

- Eliminate CapEx and significantly reduce its OpEx

- Cut into labor costs surrounding infrastructure management

Taking you on a journey **to improved business performance** with Azure Go Live

Ensono starts each cloud journey with a detailed assessment of your workloads,
helping you optimize along the way, and ensuring you can reap the tangible benefits of Microsoft Azure

Envisioning and Assessment

Providing high-level knowledge and understanding of the core capabilities within Microsoft Azure, complemented by a detailed assessment of your existing application landscape.

Azure Blue Print

Through a series of workshops, we capture, refine and agree on the blueprint that best meets your needs, avoiding making incorrect deployment decisions that may lead to costly rework.

Transformation Planning

A detailed transformation plan that identifies the key steps required to migrate into the cloud, and identification of the appropriate tools that can be incorporated into the overall project plan.

Azure Build and Migrate

Building highly scalable, fully scripted deployment of your core cloud architecture. We utilize the ARM technology within Azure to ensure a highly repeatable and consistent experience throughout.

Ensono and Microsoft Azure – solutions for your business success

Through a powerful partnership with Microsoft, Ensono have launched three migration solutions to help businesses utilize the potential of the cloud to gain a significant advantage over their competition.

By helping you shift mission-critical systems to Microsoft Azure, we will enable you to invest in your future success.

Ensono and Microsoft Azure –
solutions for your business success

SAP to Azure Migration

Migrating Microsoft Azure will streamline key SAP applications and workloads in order to:

- Enhance flexibility and agility
- Future-proof and optimize operations
- Streamline data analysis processes

Mainframe Modernization Path

Our Mainframe Modernization Path will shift your mainframe workloads to Azure in order to:

- Reduce costs
- Improve business performance
- Minimize business risk

Citrix to Azure Migration

Migrate on-premise environments to a virtual desktop infrastructure in Microsoft Azure to:

- Empower employees and improve satisfaction
- Boost productivity
- Increase revenue generation

Ensono's SAP to Azure Migration

Plan and execute the moving of SAP systems to Microsoft Azure, ensuring you can cost-effectively reap the benefits of an agile cloud infrastructure that enhances data analysis, data archiving and business continuity capabilities.

Ensono's Value Added Services

SAP Automation
Streamlined data entry for more accurate information and intelligent categorization.

Continuous Service Improvement
Ensuring the strategy is always tailored to and aligned with your business goals.

Ensono Flex
A flexible contract allowing you to move to different platforms without the need to change the conditions and the contract itself.

SAP Discovery & Assessment

Receive a clear overview, roadmap and business case to confidently move forward with your SAP to Azure journey.

SAP Platform Optimization

Overcome the skills shortage of mainframe programmers and application developers.

SAP Platform Transformation

Fully modernize your SAP systems and achieve maximum agility and flexibility.

SAP Data-Driven Organization

Empower your organization to improve decision making by unlocking business insights from your SAP data.

Ensono's Mainframe Modernization Path

A four step journey to revolutionize mainframe applications, replacing legacy systems with a modern infrastructure, and enabling you to leverage advanced cloud technology to maximize the potential of business data.

Ensono's Expertise

50+ years of experience
A team of specialists with extensive expertise in managing mainframes.
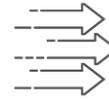

150+ mainframe customers
Managing mainframe for clients across multiple industries.

Mainframe Assessment

A roadmap to help you understand which workloads can be retired, optimized, replaced, migrated or re-envisioned.

Mainframe Optimization

Shift from a CapEx to an OpEx model and ensure business continuity for your most critical applications and workloads.

Mainframe Peripheral Apps

Migrate peripheral mainframe applications and benefit from increased agility, flexibility and cost-savings.

Mainframe Business Insights

Perform advanced analytics on your mainframe data to unlock new business insights and enable better decision making.

Ensono's Citrix to Azure Migration

Realize the benefits of Azure cloud by enabling your workforce to be more productive at their virtual workstations, while simplifying your infrastructure and optimizing it for cost-efficiency.

Ensono's Expertise

Unique expertise
Combined expertise of currently hosting Citrix workloads, with a deep understanding of both the Azure platform and Citrix Cloud.
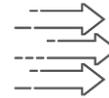

Azure Managed Service
Ongoing management of Citrix estate in Azure, utilizing Citrix Cloud and Ensono's Azure Managed Service.

Citrix Assessment

A detailed assessment to gather business, technology and operations insights to produce a report, business case and migration plan.

Citrix Optimization

Integrates business-critical Citrix systems with public cloud services to improve infrastructure flexibility, streamline management requirements, reduce running costs, and free up internal resources.

Citrix Platform Transformation

Take full advantage of Azure to provide powerful development, test and quality assurance environments to introduce maximum agility, flexibility and savings.

Data-Driven Organization

Empowers employees to make data based decisions. We will enable employees to utilize Azure's Advanced Analytics and Machine Learning in order to gain new insights within Citrix by removing the need for specialist skills to create Citrix reports – increasing productivity and competitiveness.

Complete service management to optimize your organization

At Ensono, we are passionate about technology that can help you disrupt the status quo of your market. That is why all our solutions are tailored to address your current needs and inject innovation into every aspect of your business.

Ensono M.O.

No matter where you are in your hybrid IT journey—we can meet you there. And part of what makes our journey together different is our unique service management platform—it's our M.O.

The Ensono M.O. Portal provides customers with a single pane of glass to view and control all aspects of their IT estate, regardless of their location or platform, with real-time insights and self-service ticketing.

Our unique technology toolset exceeds the capabilities of most IT service management platforms by efficiently codifying best practices to optimise your availability, financials, licensing, security, enterprise architecture and data.

Refined over two decades of successful client application, this unique technology provides an exceptional level of automation that allows operators to close down incidents, maintain high availability and deliver an unprecedented level of service.
