DESKTOP360

Microsoft WVD Hosted in Azure and Securely Delivered to Any Device

Microsoft Azure

About Desktop360

Desktop360 from Entisys360 enables a remote workforce to work from anywhere (including their home) by deploying Microsoft Windows Virtual Desktop (WVD) on Microsoft Azure (your existing or a new subscription) with Windows-based virtual applications and desktops (up to 10 virtual desktops and/or five virtual applications).

What We Offer

Desktop360 reduces the network, infrastructure and security impact of "Work from Home" by hosting Microsoft WVD in Azure to reduce endpoint management complexity and allow for consumption-based compute/storage.

With Desktop360, organizations can achieve measurable business outcomes when users are able to access their desktops, applications, files and workflows from any endpoint device, regardless of form factor or operative system.

Desktop360 makes applications installed in Microsoft WVD simpler to deploy while at the same time increasing overall performance and improving SLAs.

Businesses will see an optimal and cost-efficient Microsoft WVD experience with Desktop360 as it allows the organization to adapt to the complex, ever changing business, data access and applications requirements.

What our customers are saying

"Our organization needed a virtual desktop solution for an immediate remote workforce project. It needed to be production ready quickly and needed to scale up and down to be cost effective with our limited budget. Desktop360 was implemented by Entisys360 and it delivered a solution that exceeded all of our requirements!"

Microsoft Azure

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.

Why Azure

BE FUTURE-READY
Continuous innovation from Microsoft supports your development today and your product visions for tomorrow.With 1,000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve.

Our enterprise-grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data science tools.

BUILD ON YOUR TERMS
You have choices. With our commitment to open source and support for all languages and frameworks, you can build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support for Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers.

We embrace open source, drive innovation through collaboration, and contribute back to the community.

OPERATE HYBRID SEAMLESSLY
On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.

Enhance security, simplify access, and set smart policies across your different environments with a single identity platform trusted by 90 percent of enterprises globally.

TRUST YOUR CLOUD
Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.

With its $1B+ investment in security R&D and 3,500 cybersecurity experts, security is foundational for Azure.
