

# DESKTOP360 powered by Citrix

## Microsoft WVD Hosted on Azure and Enhanced Experience with Citrix Cloud

### About Desktop360 powered by Citrix Cloud

Desktop360 powered by Citrix Cloud from Entisys360 enables a remote workforce to work from anywhere (including their home) by deploying Microsoft Windows Virtual Desktop (WVD) on Microsoft Azure (your existing or a new subscription) with Citrix Cloud to simplify deployment and improve the end-user experience for Windows based virtual desktops (up to 10 virtual desktops and/or five virtual applications).

### What We Offer

Desktop360 powered by Citrix Cloud "Work from Home" by hosting reduces the network, infrastructure and security impact of Microsoft WVD on Azure to reduce endpoint management complexity and allow for consumption-based compute/storage.

With Desktop360 powered by Citrix Cloud, organizations can achieve measurable business outcomes when users are able to access their desktops, applications, files, and workflows from any endpoint device, regardless of the form factor or operating system.

Desktop360 powered by Citrix Cloud further simplifies the management and supportability of Virtual Desktop deployments while increasing security and 3rd party integrations with Citrix Ready solutions.

End user experience will greatly be improved with an enhanced protocol and support for offloading common multimedia solutions. Desktop360 powered by Citrix Cloud also enables a hybrid cloud deployment to meet your organization's application requirements.

*"As a financial lending organization, we focus on scalability to reduce costs, providing the best experience to our employees and ensuring the highest levels of security to protect our data. When we started looking at solutions to meet these demands, Entisys360 showed us that leveraging VDI workloads on Microsoft Azure for security and scalability while enhancing the administrator and the user experience with Citrix Cloud was the best option. Our organization is better prepared now for growth and efficiency. We could not have done it without Entisys360 and their trusted partnership! Thank you for all your efforts."*

**Jeff Ratter | Chief Information Officer**

# Microsoft Azure

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.

## Why Azure

### BE FUTURE-READY

Continuous innovation from Microsoft supports your development today and your product visions for tomorrow. With 1,000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve.

Our enterprise-grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data science tools.

### BUILD ON YOUR TERMS

You have choices. With our commitment to open source and support for all languages and frameworks, you can build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support for Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers.

We embrace open source, drive innovation through collaboration, and contribute back to the community.

### OPERATE HYBRID SEAMLESSLY

On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.

Enhance security, simplify access, and set smart policies across your different environments with a single identity platform trusted by 90 percent of enterprises globally.

### TRUST YOUR CLOUD

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.

With its \$1B+ investment in security R&D and 3,500 cybersecurity experts, security is foundational for Azure.
