ENVISION®

Envision as a Service (EaaS)

Your Solution for Comprehensive Azure Optimization

Technology is pervasive in our world today. Envision IT ensures it empowers people to contribute and businesses to thrive. We're the preferred technology partner for organizations that value employee engagement and recognize that people and technology, together, drive business success. Envision IT maintains Microsoft designations for Modern Work and Infrastructure: Azure, as well as other specializations.

Envision Makes. Awesome. Work.

What we offer

In today's rapidly evolving digital landscape, organizations of all sizes rely on cloud computing services like Microsoft Azure to power their operations and drive innovation. While the cloud offers unparalleled scalability and flexibility, it also presents unique challenges, particularly when it comes to monitoring and managing complex cloud environments.

Envision as a Service (EaaS) is our proactive Azure technology optimization solution. We combine enterprise class tools with a seasoned team of experts, dedicated to elevating your organization's productivity. Our flexible approach caters to diverse client needs, no matter your starting point!

What we will deliver

- **Critical Services Oversight**
- **Resource Performance Enhancement**
- **Security Monitoring**
- **Event Log Insights**
- **Proactive Software Monitoring**
- **Enhanced Virtualization Performance**
- **License and SSL Management**
- **Proactive System Maintenance**
- **Data Protection**

"With a trusted partner like Envision IT proactively maintaining our systems, Kendall's valuable IT team focus on strategic projects that directly impact the business by strengthening our leadership position in the industry."

~ Mike Sallmann, CFO, Kendall Packaging
