

Email & SMS with tracking enabled

Some emergency and important communications can be sent over email and sms directly to the external email and the mobile number respectively in order to make sure the communication has been delivered.

In-built Mailbox

In-built mailbox facilitates internal communication within various departments of the Smart -CRM for day to day operations without the need of sending paper based communication hence saving time and paper.

In-built social media platform

Every activities within the Smart -CRM can be posted by the teachers with the control on the viewer whether it is everyone in the Smart -CRM or only the students of their class.

Communication is an important aspect of the smooth and efficient functioning of any one!

Smart -CRM cloud mobile application provides the teachers, parents and students with an ultimate communication facility so that each user can be connected with each other all the time.
