

3 week: Proof of Concept Offering Designed to Test and Challenge the Underlying Idea

Idea evaluation and future solution validation

Why

A Proof of Concept (PoC) stage at the start of a project verifies feasibility, assesses potential for success, and acts as a pilot project to evaluate the plan. The PoC demonstrates if the desired outcome is possible, identifies critical areas, and provides valuable data for decision-making to validate the idea's merit and progression.

What

The Proof of Concept (PoC) is a crucial stage in project initiation that aims to verify the concept and assess the feasibility of the proposed solution. By serving as a pilot project, the PoC can evaluate the plan before the main project begins and demonstrate whether the desired outcome is achievable, while identifying critical areas for success. This stage provides valuable data to project stakeholders and the development team, validating the idea's potential and informing decision-making.

Benefits

Determines if the Project Idea will be feasible and how valuable it will be for the target audience

Acts as a foundation for product prototype and MVP

3 WEEK POWER APPS PROOF OF CONCEPT ENGAGEMENT FRAMEWORK

Kickoff

- Review current documents
- Map the available content to required outcomes
- Prioritize missing information
- Confirm scope
- Publish updated assessment plan
- Identify stakeholders
- Confirm operating model
- Define governance structure
- Schedule initial sets of meetings
- Tailor tools
- Set up project team, standards, governance
- Validate data sources and systems

Prototyping or PoC

- Prototype design preparation
- Design verification
- Iterative product prototyping

Demo

- Showcase the features and functionalities of the PoC results

Deliverables Refinement

- Interpret results and findings
- Present final version to stakeholders

Deliverables

- High-level Solution Architecture
- Prototype of PoC of Application
- Implementation Schedule & Milestone Plan
- Estimated & Matched T-Shirt Project Size

ESTIMATED COST:
\$29,000

The exact scope, deliverables and pricing of the PoC is subject to the specific project.

Proof of Concept Offering

→ Week 1

→ Week 2

→ Week 3

	Kick-Off	Prototyping or PoC				Demo	Deliverables Refinement
Team	Kick-Off	Workshops with SMEs				Future Project Planning and T-shirt Defining	
Power Apps Functional Consultant/ Business Analyst		Processes Scope	Implement Approach	WBS Definition	Application Customization	Testing	
Power Apps Software Engineer		Environment Preparation	Application Canvas	Application Development			
Solution Architect		Implementation Approach					
Project Manager					Future Project Planning and T-shirt Defining
