

Epiq M&A Data Risk Reduction

Identify and exclude sensitive information from being migrated during mergers and acquisitions (M&A) data discovery and migration projects.

We help our clients identify and exclude sensitive information from being migrated to a newly divested company. This is necessary when employees working on projects that will stay with the original company want to take all their data with them, but certain data needs to stay within the organization from a regulatory point of view.

Identify relevant M&A data, isolate, and migrate to the purchaser's environment using a streamlined process enabled by Microsoft Purview.

1

Review the identified data, ensuring compliance with regulations and intellectual property agreements.

2

Implement processes to review and exclude non-migratable data, ensuring it remains with the original company while allowing employees to take permissible data.

3

Enable clients using Microsoft 365 to utilize Microsoft Purview eDiscovery Premium for a more efficient workflow.

Epiq solutions

Epiq provides a complete set of Information Governance, Compliance, and eDiscovery service and technology solutions coordinated globally. These solutions can augment your use of Microsoft Purview capabilities with a battle-tested selection of on-demand and managed service options spanning the entire data lifecycle.
