

# Adoption, Change Management and Training

Maximize technology investments through sustainable adoption in your organization

Organizations constantly go through change. Numerous initiatives and projects are initiated to improve performance, increase profits, and enhance competitive advantage.

But in reality, a number of these projects and initiatives fail because people fail to adopt. Proper adoption and change management is needed in order to see actual results from these initiatives.

## ePLDT ACT (Adoption, Change Management, and Training)

ePLDT's ACT enables organizations to implement a comprehensive adoption and change management program, optimizing technology spend and maximizing the value of their software investments. It helps the organization identify their adoption state and help them realize the value of the technology investments. Using this solution, the ACT solution provides insights to help on the organization's adoption state and help drive sustainable adoption through people and real work scenarios.

### Why customers use ACT

This at-a-glance box
