DATENPROJEKTE

ERGON

What we do

We develop for you

- end-to-end
- with experienced, professional scrum-teams
- connected to your product-owner or business analysts
- software and data-analytics

We empower you

- with our specialist knowledge and resources
- Integrated into your teams or on specific occasions

Expertise as Microsoft Partner

- with focus on die Azure Cloud
-

How do we work

From Assessment Workshop to Project Start

- We assess your current situation and your needs in a 3 hour workshop.
 - You receive a formal offer in which we will carefully indicate a potential future architecture, effort-estimate and simple roadmap. Until here you will have no costs. In general we will recommend a workshop to understand your needs better – usually this will be between 3-5 days.
 - Together with you, your IT- and your business we will do the workshop which should lead us to a more detailed picture consisting of a development roadmap, high-level architecture and a reliable effort-estimate
 - From here on you can prepare for the development kick off by e.g. creating user-stories
 - We align on the project-setup and proceed with the kick off.
-

Examples

Migration to Cloud

- Monolithic Product (> 10.000 installations globally) is supposed to be re-build to run on azure
 - Client-team > 15 people with focus on legacy-technologies. Aim is that this team gets into modern technologies
 - United, virtual Team with the client
 - Integrated into the client team using the clients Azure Dev-Ops to communicated
 - Our responsibiliteties cloud-architect, lead-developer, UI-Designer
 - Timeline > 3 years
 - technologies: Azure, .net Core, Vue.js, Kubernetes, Terraform, MongoDB
-

Examples

Planning Tool

- Legacy-App needs to be adapted for new processes. This will be done as the App will be build, according to the enterprise-standard as a webbased application.
 - Client provides business analyst and product owner. The product owner has vast experience in business matters but should be coached for agil methods
 - Integration in the ERGON-Teams, ERGON Dev-Ops for communication
 - United, virtual Team with the client
 - Our responsibilities: agil coach, development-team (3 FTE)
 - Timeline 1 Year
 - Technologies: Azure, .net Core, Vue.js, SQL Server
-

Examples

Pricing Tool

- An prototyped-app should be re-build as azure-based webapp for a global rollout.
 - Client provides business analyst and product owner
 - Integration in the ERGON-Teams, ERGON Dev-Ops for communication
 - ERGON development-team develops end-to-end based on prototype and clients user-stories
