Teams Conferencing Rooms

Teams Conferencing Rooms Service Profile: Ergo

As Ireland's leading cloud and IT managed services provider, Ergo excels in matching technology to business needs and has been helping organisations achieve their strategic goals for over 27 years. Ergo helps clients achieve business advantage through digital adoption and by encouraging its team of more than 800 IT professionals to continually lead from the front.

Our solutions are built on proven Microsoft technology and provide the highest level of impact for business-critical applications. With Ergo's Teams Conferencing Rooms Service, organisations can ensure that everyone feels closer and more engaged so they can fully collaborate.

WHAT WE OFFER

As more staff return to the office there is a real need to enhance the video call conferencing experience.
A part of the Modern Work portfolio we offer the Teams Conferencing Rooms Service

Teams Rooms helps everyone feel closer and more engaged so they can fully collaborate. Remote participants have a presence in the room, while in-office participants retain their identity.

As well as a full consultation and site survey we offer a fully deployed solution and service. From AV to installation and from implementation to integration with Microsoft Teams

Teams Rooms run software that is built on top of the powerful Teams platform and designed for use on Teams Rooms devices and shared hybrid meeting scenarios.

WHAT OUR CUSTOMERS ARE SAYING

"A huge THANK YOU from myself personally and all of the staff for your support and commitment in delivering and installing this very important tool. It will greatly facilitate our work over the coming months. I know how much effort went into this and I am very grateful. ..."
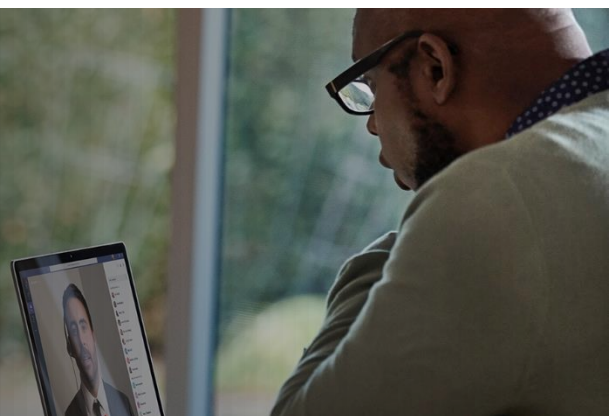

– IT Manager, The Company

Microsoft

Teams Conferencing Rooms Service

Our solutions are built on proven Microsoft technology and provide the highest level of impact for business-critical applications. With our expertise in Modern Work, we will help you via the Microsoft Teams Conferencing Rooms Service making collaboration easier and interactions more engaging and inclusive across your meeting spaces

3 step process

Phase 1 – Detailed Survey

The first step for each of these rooms is a full survey which will involve a detailed check of the current configuration, access under the floors/carpets to all relevant power/network/HDMI cables.

The positioning of the new hardware and the type of fixings needed to mount it will be verified also and then all documented.

Phase 2 – Recommendations

The output of these surveys is a detailed deployment plan including hardware positioning and mounting details and all related cable routing. Recommendations on re-orienting furniture will also be included if necessary, some rooms may have off-set tables for example.

Phase 3 – Deployment and Handover

Following the completion of Phase 1, the required hardware list and installation effort for Phase 2 will be updated. Estimates are based on our view of the rooms as provided in the pictures and the information provided. Recommendation are included, but the final hardware configuration will be agreed on with the customer.
