

Ericsson Routes is like a Waze™ for wireless cellular quality

MICROSOFT AZURE SOLUTION BUILDER PROFILE: ERICSSON

Ericsson is one of the leading providers of Information and Communication Technology.

Ericsson Routes brings to autonomous and unmanned vehicles the awareness required to have consistent and reliable connectivity throughout the journey and for all wireless service providers. From a single integration point and a single prediction engine.

Whether it is a tele-operation feed or access to edge compute resources, Ericsson Routes will help you stay connected.

A common engine

A single prediction engine, regardless of the operator, to enable reliable decisions.

Constantly improving

Every new vehicle using Ericsson Routes improves the service for all other vehicles.

Planning

Plan your new deployment areas with the mapping tools.

On The Move

Get the latest updates before or during trip with the RESTful API.
