# ERP.net Express

Edition Overview

Express is a scalable business solution with **a universal purpose**. It is meant for businesses that are looking for ways to enhance their teamwork and improve the services they provide to their customers.

Designed to blend social and technological functionality into one, **Express** is easy to implement into your business and straightforward for your teams to use. These properties power **Express** to be a productivity-driven investment that enables your company to reap swift results in return for minimal efforts on your side.

Take a Look at Our Express Overview Video

Check out our **ERP.net Express** overview video to discover how your business can benefit from our **Express** solution.

Explore functionalities like personal productivity, team collaboration, and our 360-degree CRM to empower your teams and accelerate success:

Functionality and Purpose

This edition offers a set of widely used, intuitive business tools, all integrated in a single system:

- Personal and team calendars and To do lists
- Group chats with available AI assistants
- Personally assigned documents and shared file management

and others.

ERP.net Express combines these tools for personal productivity and team collaboration with the expanded functionality of:

- the built-in CRM system
- Agile project management
- Artificial Intelligence (AI) module

All these apps and modules work together to **strengthen** your teamwork, greatly reduce the need for a plurality of specialized external apps, and boost your staff's output.

> **TIP**
> The apps and modules packaged in **Express** are designed to operate unconstrained by local, national, or any other legal regulations, making Express a **worldwide** applicable solution.

This makes it the perfect choice for businesses that want to unify and centralize their team efforts, CRM processes, and project management in a single place, controlled via the same unified user interface.

Application and Benefits for Your Business

ERP.net Express can be used as a standalone (self-sufficient) solution by any company - no matter how large or small.

It can also serve as an exceptional companion **running alongside** the main ERP system in your organization, unfolding new functionality to your business. In addition, startups and microbusinesses that are yet to be in need of a complete ERP system can also benefit from the simple, user-friendly **Express**.

Key functionalities Express brings to your business

My Apps, a toolset for personal productivity and seamless teamwork

- **Dashboard**: Gain an all-around view of your assignments and goals in a fully customizable dashboard.
- **Social Groups**: Make use of chat, team calendar, group to dos, and files that are automatically shared with every group member.
- **Personal Calendar**: Stay on top of your schedule with a calendar that pulls in a single place every activity requiring your attendance.
- **To-Do Tasks**: Manage your small and simple tasks quickly and safely to guarantee nothing is too small to slip away in a busy day.
- **Timeline**: Check your timeline to see what new events have been going on recently involving you and your company.
- **Documents**: View and manage all documents that you create and those assigned to you by others - in your neat, organized personal space.
- **Tiles**: Create and use various views with different sections of your data that you can access and switch between in a single tap.
- **Favorites**: Learn what happens with any company, product, campaign, or document flow of interest.
- **Live Notifications**: Receive real-time updates on chats, favorites, to dos, and other social and business aspects to stay in touch with everyone and everything.

The built-in 360-degree CRM system of ERP.net

- **Contact Management**: Store, organize, and manage all your contact and their data in a few quick taps.
- **Customer Management**: Build simple and effective customer records.
- **Lead Management**: Efficiently capture and nurture leads to convert them into paying customers.
- **Opportunity Conversion and Quotation**: Track opportunities and generate quotations to close more deals faster.
- **Marketing Management**: Plan and execute marketing campaigns, track your and your competitors' solutions, and measure how close you get to your goals.

Modern project management tools

- **Classic Projects**: Allocate materials, time, and labor and track the usage efficiency from start to completion.
- **Agile Project**: Work smart, react quickly, and adapt easily to changing requirements.

Platform-integrated AI

- **AI Models**: Personalize multiple AI models to immerse them in the context of your business operations.
- **AI Chat**: Consult yourself when in doubt and ask the arbitrator when team opinions differ.
- **AI rules**: Configure custom AI business rules to automate specific tasks and ensure data accuracy.

Manage Subscriptions

- **Subscriptions and Billing Cycles**: Manage what, when, and how much your customers receive with ease and confidence.

Manage Services

- **Maintenance and Repair**: Manage and track the services for physical assets.
- **Service Orders and SLAs**: Streamlined processes for service contracts, service-level agreements (SLAs) and delivery.
- **Billing and Invoicing**: Automated and transparent billing for services rendered.

Streamline your daily workflows, strengthen your teamwork, and drive productivity beyond limits - with ERP.net.
