

# Training Plan 365

## Get the *right* start-up training for Dynamics 365 Business Central

Make sure you get a good and positive start with your new Dynamics 365 Business Central solution. Let us help you getting the *right* start-up training, so you will get the necessary security, comfort and knowledge about working in the solution. A personal training coordinator will be assigned to you, who will coordinate the right training plan for both you and the other employees of the company.

When you replace your current IT solution with a new one, it is important to get a good and right start, so you will minimize the frustrations and insecurity among the employees of the company. A positive start will affect the following opinion and use of the IT solution positively. The right knowledge will give satisfied employees and will optimize the use of the IT solution.

With Training Plan 365 you will make sure that the employees will be safe and ready to work in your new Dynamics 365 Business Central solution.

## 5 strong advances:

1. Get a personal training coordinator who will coordinate the right training plan for your company
2. Get help with *how* the employees get started – and *where* to start
3. Get help with *which* training is the right one for each employee
4. Minimize the insecurity and frustrations in the company when implementing a new IT solution
5. Make sure the employees get the right knowledge and comfort using the solution – higher satisfaction

# This is what you will get...

The personal training coordinator will coordinate a three months training plan for every employee of the company. This plan will be based on the recommended training matching the needs of the company, as well as suggestions to extra training if needed.

## Training plan
