

PERFORMANCE SERVICES

LCS Environments

- User Management
- Development Cloud Hosted Environments
- D365 Builds and more

Performance Benchmarks

- Performance Objectives, Scenarios
- Tests & Simulations
- Reports

Performance Key Patterns

- Efficient Performance Patterns
- Discovering Anti-patterns

Code Review

- Run LCS Code Analysis
- Document Coding Best Practices

System Scalability

- Production Environment
- Test System Expansion Scenarios

Data Volume Management

- Data Clean up, Archiving and Compression
- Define Automated Cleanup Processes

Performance Troubleshooting

- Components (12)
- Tools (4)
- Load Balancing and Optimizations

Environment Planning

- Define Dev-ops Best Practices
- Test Network Latency
- Plan for Future Requirements

Licensing

- Review Current Licenses
- Plan for Future Requirements

Production Environment Healthcheck

- Confirm Correct Production Environment Sizing
- Document Current Environments
