

● Spreadsmart

AI-powered financial spreading

Automated data extraction for 70%-time savings and 99.6% data accuracy:

- Extracts data from PDF, scans, Excel, Word
- 120+ languages supported
- Advanced OCR Technology
- Domain-specific AI mapping
- Built-in validations
- Seamless API-based integration
- Covenant management

CASE STUDY:

Leading Global Bank Uses Spreadsmart to Improve Data Accuracy and Accelerate Credit Decisioning

When a London-based global bank embarked on its lending transformation journey, a major bottleneck was the manual extraction of borrower data, which required extensive validation. Partnering with Evalueserve, they used Spreadsmart to automate financial data extraction for faster, more accurate spreading.

Solution:

- Deployed Spreadsmart to 120+ users across all global credit teams
- Automated document processing and financial data extraction
- Domain-specific AI for enhanced accuracy
- English, Spanish, and Asian language capabilities
- Integrated data outputs directly into the credit risk platform to accelerate financial spreading and analysis

Benefits:

Faster, Smarter Credit Decisions

- 70% Time Savings for Spreading
- 99.6% Data Accuracy
