

DON'T LET ANYONE BE LEFT OUT

Is your organization accessible?

Today, 1 in 4 people face communication barriers - including 466 million people with hearing challenges, 360 million with ADHD, and more than 1 billion of elderly citizens and non-native speakers. This isn't just about compliance - it's about, inclusivity growth, and social impact.

NO BARRIERS. JUST OPPORTUNITIES.

The EVENLY inclusion-tech communication platform enables your organization to instantly connect with everyone, while ensuring compliance with the European Accessibility Act (EAA) and the Corporate Sustainability Reporting Directive (CSRD). Trusted by leading enterprises, EVENLY delivers immediate accessibility without IT complexity.

HOW DOES IT WORK?

On-site: Your customers simply scan a QR code with their mobile phone or share your staff's mobile or tablet. Instantly, they gain access to real-time speech-to-text subtitling, translation in 100+ languages, and sign language interpretation - no apps needed.

Remotely: Through a simple web link, customers initiate instant audio/video calls or schedule appointments. The same inclusive features ensure every interaction is barrier-free, whether for customer service, sales, or support.

TRIPLE IMPACT FOR YOUR BUSINESS

Instant Compliance: Meet EAA and CSRD requirements without infrastructure changes

Business Growth: Tap into previously unreachable or undiscovered customer segments

Social Leadership: Demonstrate genuine commitment to inclusion and accessibility

ENTERPRISE-READY

- Azure cloud security certified
- Microsoft Marketplace verified solution
- No hardware or software requirements
- Immediate deployment
- Professional sign language interpreters

Don't risk non-compliance or miss out on serving every customer. Avoid exclusions and contact us today:
