

ERP Harmonization by Eviden

Harmonize, Optimize, Excel: Eviden's ERP Harmonization Services and Solution is powered by Microsoft Azure Cloud and D365- Unleashing Seamless Integration for Streamlined Operations and Sustainable Growth.

What We Offer

Our comprehensive ERP Harmonization services and solutions are designed to streamline business operations and drive efficiency for our clients. It offers a range of features, such as process harmonization, robust change management, and user training, ensuring a smooth transition and sustained adoption.

Our solution's seamless integration with Microsoft products sets it apart. It leverages the power of Dynamics 365 Finance and Operations (FO) and copilot.

Our harmonization solution delivers enhanced scalability, agility, and data consistency by harnessing Microsoft's platform capabilities. This integration enables our clients to benefit from industry-leading technology while maximizing their ROI and staying ahead of the competition.

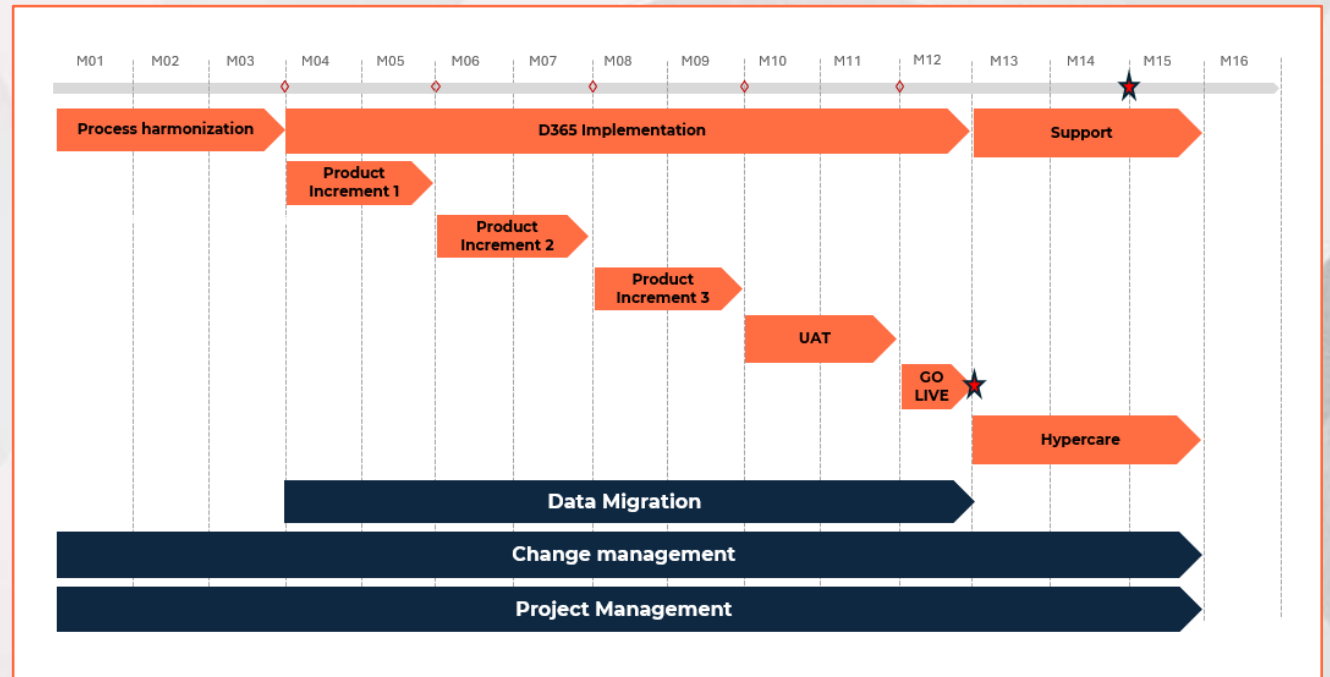

ERP Harmonization by Eviden

How it Works

- A harmonizing consulting phase is recommended to define common work procedures through all the group companies.
- Change management strategies involve appointing ambassadors and providing comprehensive training and support during all project phases, hypercare, and ERP stabilization.
- Our approach combines strategic and digital transformation consultancy, effective change management, and robust Dynamics 365 FO and copilot implementation.
- Tailored solutions ensure a seamless transition and long-term success for clients with common procedures for the companies and business units of the corporation.

Execution Strategies and Solutions

ERP Harmonization by Eviden

Customer Outcomes

Common work processes and operating models for all the business units and companies of the group

Upselling and cross-selling Opportunities

Customer Success

Company: Edison Next

Solution:

Process Redesign and Envisioning:

- Defined common work processes and operating models.
- Set clear objectives for 3 company groups and 20 legal entities.

Business Change Management:

- Developed a communication plan.
- Trained ambassadors and engaged key stakeholders.
- Key User support during all project phases, go-live, and stabilization

Implementation of Full D365 FO:

- Implemented finance, purchasing, inventory, and project management modules.
- Simultaneous go-live for 200 end users in 3 company groups within 1 year.

Outcome:

- Achieved remarkable reduction in operating costs by eliminating duplication and inefficiencies.
- Enhanced cross-selling and upselling opportunities.
- Established a unified financial control and reporting tool, providing access to a single source of truth.
