

Green Procurement

Green procurement strives to minimize an organization's environmental footprint by implementing responsible sourcing and sustainable procurement practices throughout its supply chain.

What We Offer

Solution features:

- Enables responsible sourcing and sustainable practices, catering to UN Sustainable Development Goals.
- Enables sustainable supplier choices, ensuring cost-efficiency, quality, and carbon footprint control.
- Integrates green indices, optimizing procurement processes for sustainability.

Client Offerings:

- Sustainability-Centric Procurement: Facilitates assessment and onboarding of high-focus sustainability suppliers.

Differentiation & Competitiveness:

- Eviden's Distinct Value: Offers comprehensive sustainability solutions with competitive pricing, backed by SAP partnership and multilingual expertise.

Microsoft Integration:

- Azure-Powered Solution: This solution utilizes Microsoft Azure for scalability, reliability, and security, aligning with Microsoft's sustainability commitment for holistic client offerings.

Green Procurement

How it Works

- Conduct discovery workshops to assess and design the requirements.
- Charter the path to meet all legal requirements to support and ensure ESG initiatives and leverage existing SAP solutions.
- Implement Green Procurement, an add-on built on SAP BTP, as an extension to SAP Ariba and S/4 HANA procurement.
- Agile implementation approach for quick deployment.
- Solution can be customized based on the customer's needs and requirements.
- Follow an iterative approach to provide unique value to our customers.
