

# Microsoft 365 Copilot Implementation

Eviden provides an End-to-End solution offering for Microsoft 365 copilot implementation for enterprise and government organizations leveraging Responsible and Sustainable AI

## What We Offer

At Eviden, we pride ourselves on our strong partnership with Microsoft and extensive expertise in delivering innovative services across the Microsoft suite. As early adopters of **Microsoft 365 Copilot**, we've witnessed firsthand how this cutting-edge AI assistant revolutionizes our work.

- Our Microsoft 365 Copilot implementation approach is **personalized** and **customized** to your unique Copilot goals and organizational needs. Whether you're streamlining processes, boosting collaboration, or enhancing creativity, we've got you covered.
- Our **comprehensive Microsoft 365 implementation offer** ensures that your organization fully leverages Copilot's full potential. From consulting to readiness, implementation, and support, we guide you through every step of the process.

# Microsoft 365 Copilot Implementation

## How it Works

- Eviden's Copilot transformation methodology involves four phases:
  - Consulting
  - Readiness
  - Implementation
  - Support
- Responsible and Sustainable AI frameworks guide solution design throughout.
- Consulting phase offers personalized advisory services for roadmap creation.
- Readiness and Implementation phase includes Microsoft 365 solutions, security measures, and Adoption & Change strategies.
- The support phase focuses on ongoing support, governance, and data security.

## Execution Strategies and Solutions

## Customer Outcomes

Unlocking Creativity and Productivity with Microsoft 365 Copilot

## Customer Success

**Company:** Eviden

**Solution:**

- Eviden conducted a thorough assessment to identify process, personnel, and data gaps for implementing Microsoft 365 Copilot.
- Licensing requirements were analyzed as part of the assessment process.
- Eviden developed a concrete roadmap based on the readiness assessment findings.
- Eviden participated in the Microsoft Early Access Program, conducting a Copilot Pilot.
- 150 licenses were allocated across various groups within Eviden for experimentation and discovering valuable use cases.
- A Copilot Early Access Program (EAP) Community established a feedback loop for sharing experiences and resolving queries within Eviden.

**Outcome:**

- Implemented Microsoft 365 Copilot Pilot project, enhancing overall productivity and creativity at Eviden.
- 70% of our employees said they were more productive
- Employees were nearly 4 times faster catching on a missed meeting
- Uncovered recommendations for a successful pilot and implementation that can be successfully replicated for our customers.
