

Eviden's Microsoft 365 Copilot Readiness Assessment Program

Eviden's Microsoft Copilot assessment evaluates your organization for readiness to integrate Copilot in your organization. Our assessment identifies gaps and provides an implementation roadmap of how Copilot can be integrated into your organization to streamline your processes and empower your teams to deliver more.

What We Offer

Microsoft 365 Copilot Readiness Assessment Program will be a series of interactive workshops spread across 4 weeks.

- The assessment will thoroughly analyze your organization's processes, personnel, and data infrastructure.
- Eviden's Microsoft 365 Copilot Readiness Program will assess your data governance and configurations.
- As part of this assessment, we will outline the journey to becoming a Copilot-ready enterprise (including security and compliance guidelines).
- Our persona-based approach ensures effective user grouping based on moments that matter, ensuring better alignment to organizational value creation.
- It will provide insights on the business benefits and ROI.

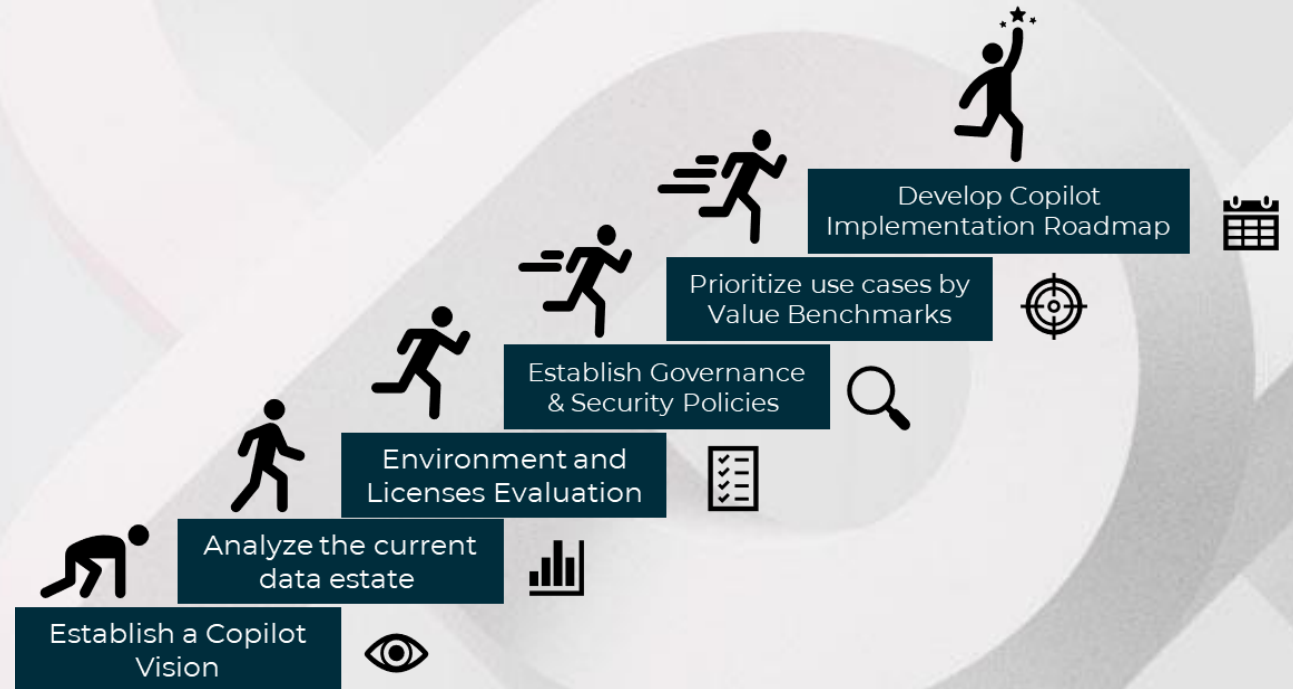

Microsoft 365 Copilot Readiness Assessment Program

How it Works

- The assessment provides an opportunity to unleash the full power of Microsoft 365 Copilot for your entire organization.
- Eviden will give you a comprehensive readiness scorecard to identify the steps necessary to ensure a smooth and successful implementation.
- Eviden will also design a customized roadmap that will align with your specific goals and needs for your Copilot Implementations.

Execution Strategies and Solutions

Microsoft 365 Copilot Readiness Assessment Program

Customer Outcomes

Fast-track your Enterprise-wide implementation journey of Microsoft 365 Copilot.

Customer Success

Company: Eviden

Solution: Eviden conducted a thorough evaluation to gain insights into implementing Microsoft 365 Copilot, focusing on the procedural, personnel, and data aspects. In addition, Eviden evaluated the organization's licensing needs. Throughout this assessment, the team proposed improvements to fortify security, data management, and governance controls for the effective administration of Copilot within the organization.

Outcome:

- Received an in-depth analysis of the organization's current processes, personnel, and data infrastructure.
- Identified the gaps and opportunities for improvement in the current Microsoft 365 environment.
- Outlined the journey to becoming a Copilot-ready enterprise, including security and compliance guidelines.
- Received insights on the persona-specific business benefits and ROI of Microsoft 365 Copilot.
