# Azure Landing Zone **by Evolutio**

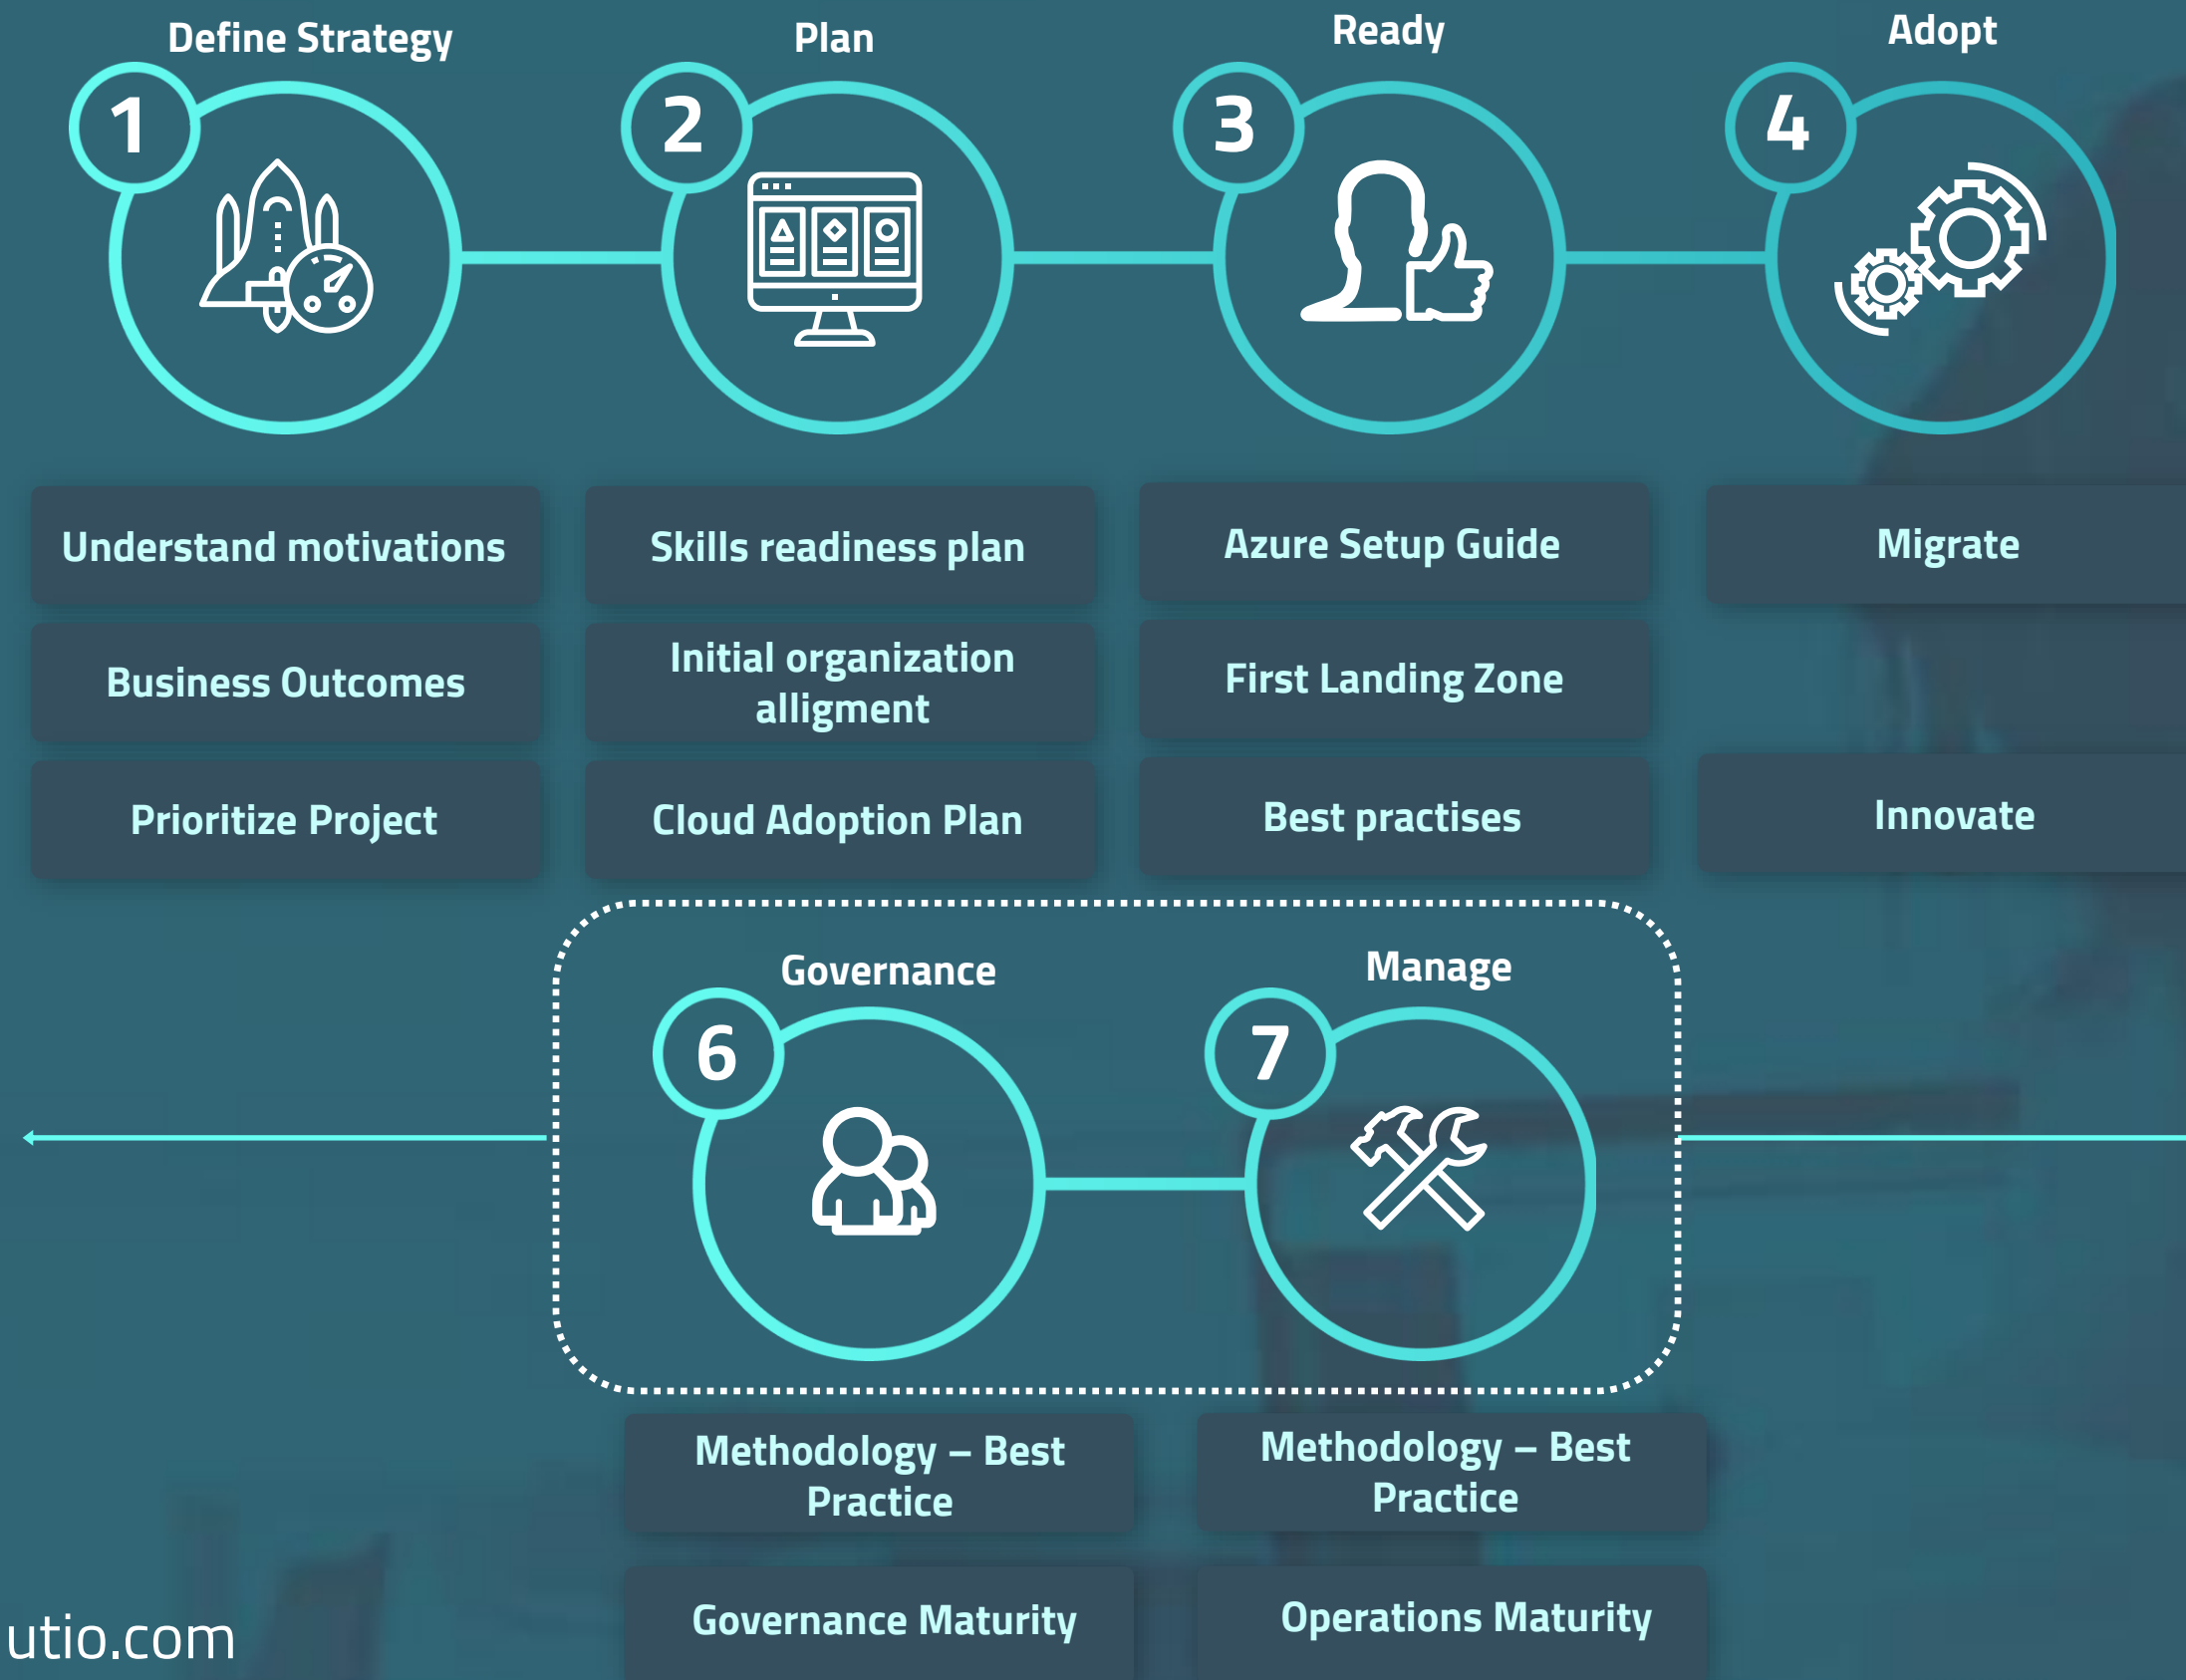

#route2cloud\_

Based on **Microsoft Cloud Adoption Framework**, **Azure Landing Zone by Evolutio** provides enterprises with cloud-based IT architecture design and governance solutions that cover account management, resource management, network planning, financial management, compliance auditing, and security protection. The service helps enterprises design and manage IT environments on the cloud for efficient collaboration, security compliance, and cost control.

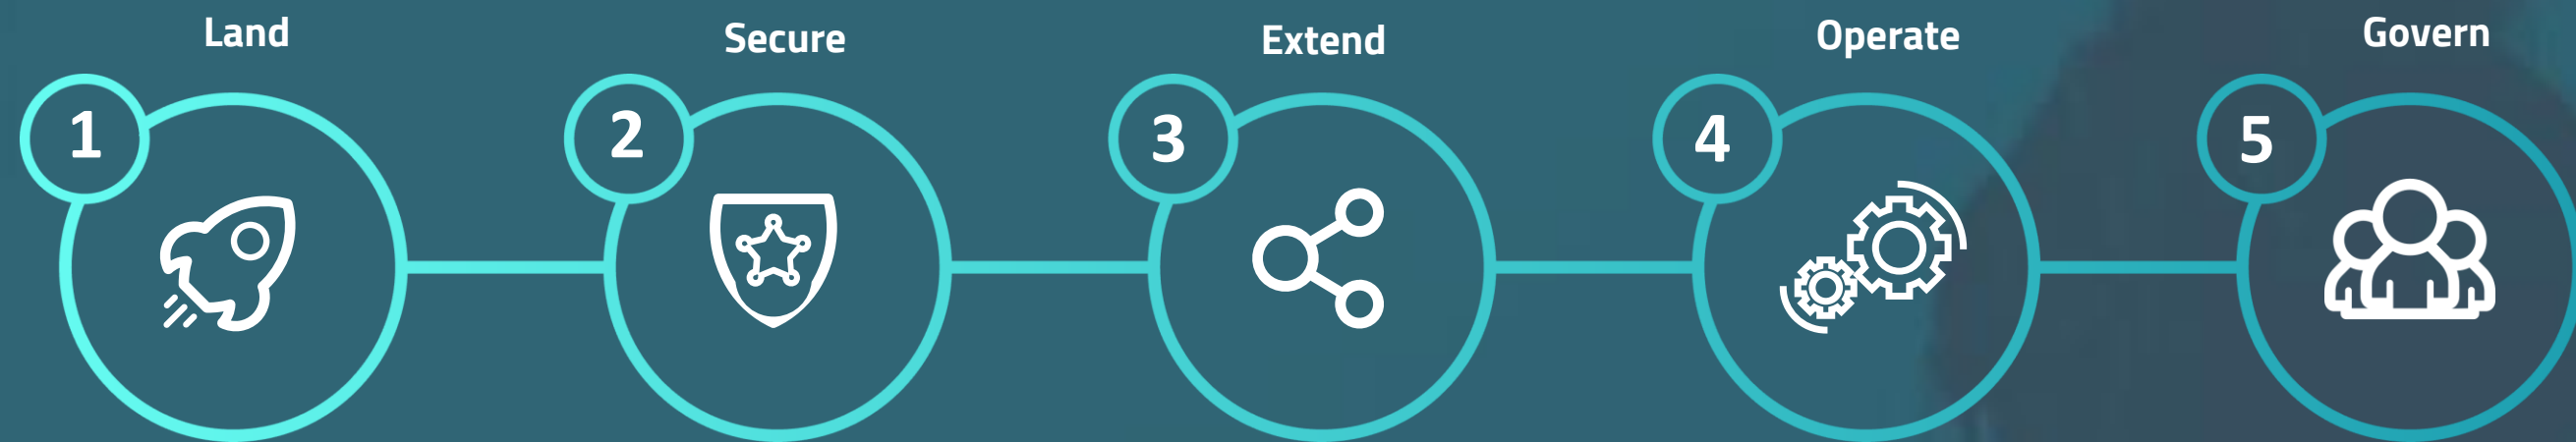

Whether you are deploying your first application in Microsoft Azure or you are operating complex environments, **Azure Landing Zone** implementation options are tailored to your specific needs.

# Microsoft Cloud Adoption Framework for Azure

# Evolutio Cloud Design Plan

Objective	Align Landing Zone to your organization	Link your cloud to your current Identity and security policies	Expand your cloud on top of a defined Framework	Build the next operations framework	Add modern cloud Governance to your organization
Benefits	Start with the right enrolment based on cloud templates and blueprints	Based on best practices, set the right Identity and Security baseline	Expand with new services and applications based on a defined baseline	Provide new operations compliance with protected and reliable capabilities	Automate security, governance and compliance policies

# Azure Landing Zones **Options**

## Cloud Exploration

### Bronze

#### Start in the cloud

Explore the cloud journey and ensure the key components are under control. Includes basic provision of standard architectures, basic security and governance, ready for initial projects in the cloud

**5.900 €**

## Production Environments

### Silver

#### For Small Medium Business

Best practice implementation of a baseline architecture covering governance, security, monitoring and Access control to ensure a successful cloud adoption.

**11.500 €**

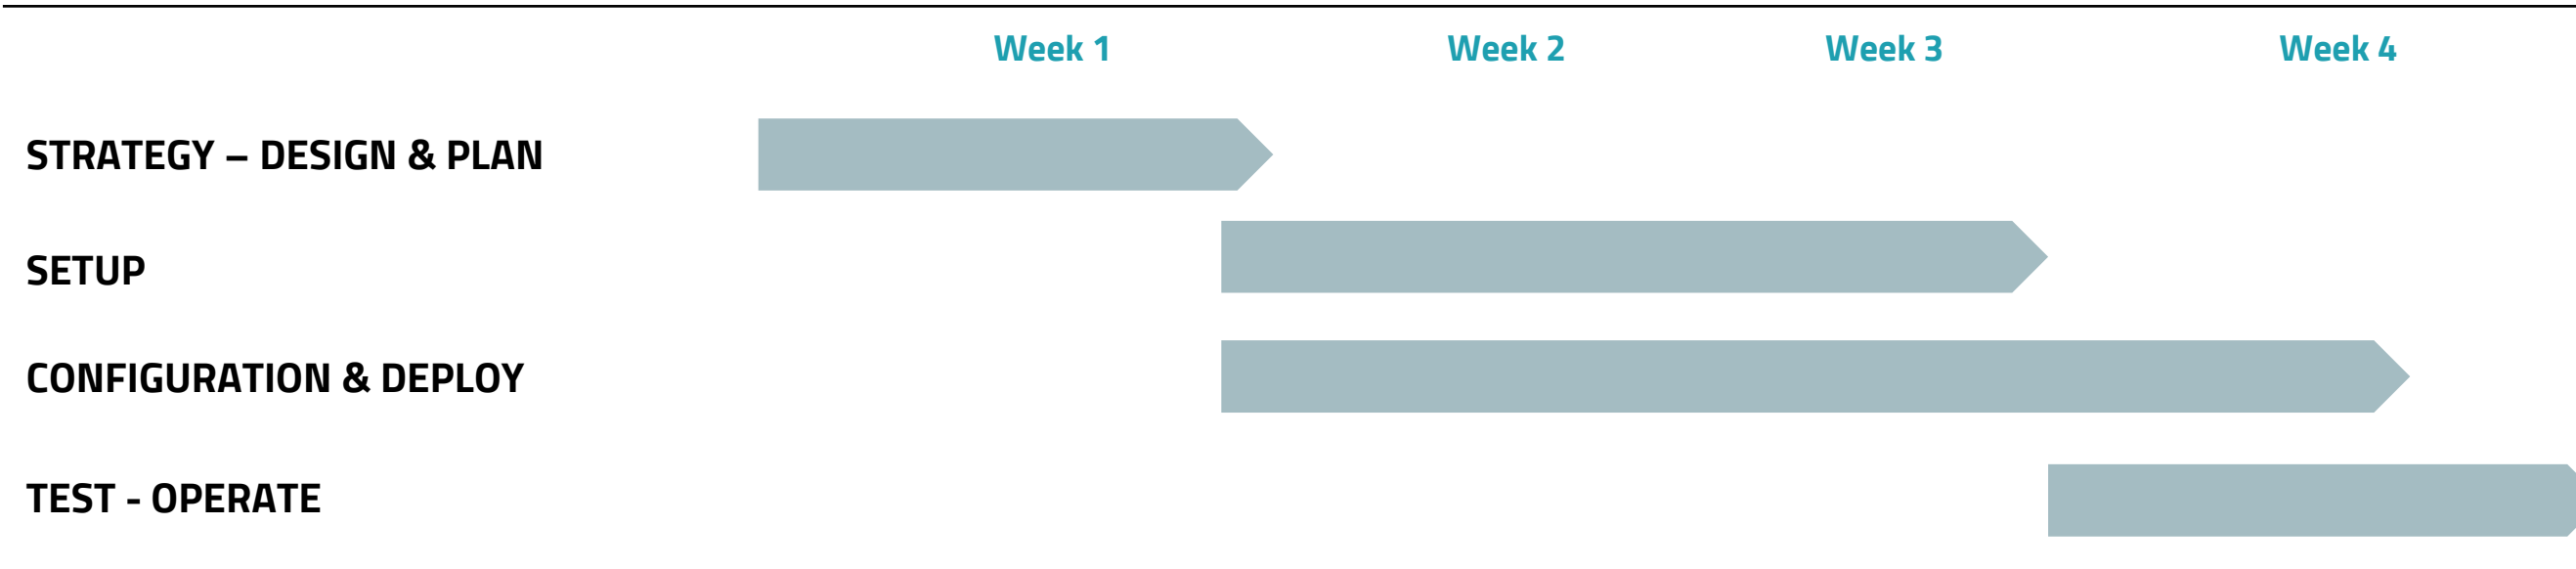

### Gold

#### Core Business Landing Zone

Next Generation Landing Zone framework to ensure full operational readiness using advanced governance and security controls for all type of cloud workloads.

**Custom Pricing**

# Example Delivery Plan **Landing Zone Bronze**

PHASE	Tasks
Strategy Design & Plan	<ul style="list-style-type: none"> <li>Identify type of Microsoft Contract.</li> <li>Reference Architecture Design</li> <li>Tenant – Domain creation</li> <li>Identity Management</li> <li>Azure Connectivity</li> </ul>
Setup	<ul style="list-style-type: none"> <li>Deployment of Basic Reference architecture</li> <li>Creation of Service account and automation</li> <li>Creation of System administrator account</li> <li>Creation of Billing account</li> <li>Creation of Monitoring account</li> <li>Security center configuration</li> </ul>
Configuration & Deploy	<ul style="list-style-type: none"> <li>Deployment of Services defined in Setup Phase</li> <li>Procedures and standards</li> <li>Security policies</li> <li>Tagging and Name convention</li> <li>Internal connectivity</li> <li>Permission delegation</li> <li>Best practices</li> </ul>
Test - Operate	<ul style="list-style-type: none"> <li>Testing &amp; Final Roll-out</li> </ul>
