

Copilot for M365 Readiness Assessment

As businesses progress in the digital era, adopting AI tools like Microsoft Copilot for M365 is essential for enhancing productivity, collaboration, and innovation. The Copilot for M365 Readiness Assessment evaluates your organization's readiness to leverage this AI assistant by examining infrastructure, user preparedness, and data security, providing insights for a successful deployment within your Microsoft 365 environment.

Copilot for M365 Readiness Assessment Phases:

1

Assess and Envision

- Overview of Copilot for M365: Architecture & Capabilities
- Review existing tenant
- Assess organizational goals and objectives
- Identify pain points and challenges
- Use case identification

2

Technical Readiness

- Configuration review to ensure environment's readiness for M365 Copilot
- Assess data protection, security & governance posture and address gaps
- Technical requirements recommendations
- Evaluate licensing and user accounts requirements

3

Build the Plan

- Review assessment outcomes and provide actionable guidance
- Develop strategic plan for Copilot for M365 rollout: Pilot or broader implementation

Why EVOPOINT SDN BHD?

With deep expertise in Microsoft 365 solutions, EVOPOINT will help you unlock the full potential of Microsoft 365 Copilot, leveraging AI to transform workflows and boost productivity. Our team ensures seamless integration, providing AI-driven insights and automation to enhance collaboration and efficiency. As your trusted partner, we'll guide you every step of the way to fully harness the power of AI in your organization.
