

Teams Express

Devised by Evros, Teams Express allows you to experience the power of Voice in a controlled, secure and managed environment.

There has never been a more pertinent time to connect. Over the course of 2020, millions of businesses across the globe have had to adapt and transform to their new circumstances. And now, with whole offices dispersed and working from home, staying in touch has never been so important.

To enable businesses to work more closely together, Microsoft has invested heavily into Teams functionality, security and connectivity – especially in recent months. And as a result, Teams can give your business so much more.

One of the key capabilities within the platform, is Voice, which not only enables you to converse with colleagues at the click of a button, but it also gives you the power to call your connections from outside your organisation, straight from your PC.

It also enables meetings, video calls, webinars and live event streams, giving you the tools you need to connect and deliver – wherever you are.

What is Teams Express?

Teams Express is a unique engagement devised by Evros, which gives you the ability to trial Teams Voice on your network to understand impact, functionality and requirements for full Teams Voice implementation.

Unique Benefits

-  Quick and easy solution to trial Teams as a PBX
-  Works in parallel with your existing systems or can be integrated with an existing PBX if required
-  Builds the groundwork for a wider Teams PBX adoption
-  A complete reporting system built-in to the platform.
-  Add a range of solutions developed by Evros and our partners to meet the most demanding Voice requirements
-  Enable and enhance your employees' remote working experience

Evros will deliver

Teams Express delivers the following engagement:

1 Requirements Workshop

Our initial engagement is for us to understand your unique requirements, infrastructure and also, what you would like to achieve.

2 Trial implementation

During the trial, we will:

- Enable your Teams service (if required) and deploy the client to a pilot group
- Install trial virtual SBC and trial SIP trunk
- Assign temporary DDI and Voice services
- Configure your devices and enable them
- We can also extend your trial to enable co-existence with your existing PBX for further assessment

3 Testing

We will then perform vigorous User Acceptance Testing to ensure your Proof of Concept is accurate and beneficial.

4 Documentation and Opportunity of Deployment

Finally, we will document our solution for you to review. At this point, you will have the opportunity to progress your POC to Production.

The Evros Teams expertise

Evros has been delivering Microsoft telephony solutions to both public and private sector companies for many years and has a wealth of experience delivering Voice in the most challenging of situations. We have partnered with the key providers such as Poly, Jabra, AudioCodes and Enghouse to deliver a single integrated solution for your business, backed by Evros 24x7 support services.

Our team

We've invested heavily in developing our own, first of its kind, dedicated Microsoft practice which has since grown to over 40 consultants and engineers, all focused on delivering Microsoft solutions, backed by more than 150 level 1, 2, 3 and 4 engineers offering full technical support services.

Our Experience

Implementing this investment has enabled us to cultivate a centre of excellence. As a result, our Microsoft Teams engineers are highly experienced in deploying enterprise scale Teams migrations, successfully, securely and on-time.

24/7 Security

Supported by our Security Operations Centre, which encompasses our Microsoft Security Services subdivision, we also ensure all projects are delivered securely and in-line with any industry relevant compliance regulations.

Who We Are

Evros is a proud Microsoft Gold Partner, enabling businesses like yours to deploy a consistent Teams experience that maximises efficiency, flexibility and productivity.

Established in 1990, Evros leads the way in developing quality and innovation within the IT services industry.

Gold

Microsoft Partner

Our true strength is the ability to help identify, build and manage the exact Microsoft solution for your business today and your growth, tomorrow.

Evros Technology Group comprises Digital Planet, itContracting, eSource and mySoftware.ie.
