

Infrastructure assessment by eir business.

eir business's infrastructure assessment that uncovers cost & risk, on your path to Azure.

Microsoft Partner

Azure Expert MSP

eir business
secure, managed
solutions for all.

Infrastructure assessment **overview.**

An expert-led assessment, delivered by our Azure Expert MSP team. **The clarity you need on cost and risk as you journey to Azure.**

Our business's Azure Expert MSP team delivers the Infrastructure Assessment using the Dr Migrate platform as the core discovery and planning tool.

While most migration discussions get lost in servers, VMs and SKU details, our business keeps the focus on what matters: understanding cost, identifying risks, and building a structured plan for moving to Azure.

Using Dr Migrate's automated discovery and analysis, the service gives you a clear view of your environment, highlights optimisation opportunities, and produces a phased migration roadmap your leadership can act on.

The 5 critical insights before you migrate

Most Azure migrations fail not from technical complexity, but from unknowns. Our assessment eliminates the guesswork—giving you a data-driven foundation for your cloud strategy.

01. True Costs — Accurate Azure projections

02. Asset Intelligence — Full estate visibility

03. Quick Wins — 20-30% immediate savings

04. Sequencing — Risk-ranked roadmap

05. Blueprint — Timeline & resources defined

Move from “planning paralysis” to execution with a migration strategy validated by actual infrastructure data—not assumptions.

65% of failed migration projects spent less than 20% of their total timeline on the planning and assessment phases.

The **four core modules** of our assessment.

At the centre sits the clarity leaders need to make migration decisions, built on four assessment areas that turn discovery into a structured plan for Azure.

1. Visibility

Environment & dependency analysis.

End-to-end inventory of servers, storage, disk sizes, operating systems, applications and dependencies across your IT environment.

Outcome:

Clear visibility of your entire estate.

2. Efficiency

Cost & efficiency assessment.

Analysis of utilisation patterns, licensing, Hybrid Benefit, Reserved Instance suitability and storage efficiency to highlight savings opportunities.

Outcome:

Clear visibility of your entire estate.

3. Confidence

Application evaluation.

Analyse workloads with 6R methodology: complexity scores & dependency insights to determine rehost, refactor, replatform, rebuild, retain or retire..

Outcome:

Defined modernisation paths for every application.

4. Direction

Migration strategy.

Phased migration waves based on dependencies, business impact, readiness and risk, forming a realistic Azure delivery plan.

Outcome:

Structured, execution-ready migration roadmap.

What you'll receive from our assessment.

We turn discovery into decision-ready plans and help you shape a practical migration strategy.

Assessment outputs

01. Cost savings & run-rate insights.

Breakdown of optimisation opportunities, right-sizing signals, licensing efficiencies, RI suitability and areas to reduce cost now.

02. Value-first migration roadmap.

A plan prioritising workloads by value, complexity, business impact and dependencies — providing a path from on-prem to Azure.

03. Security & risk summary.

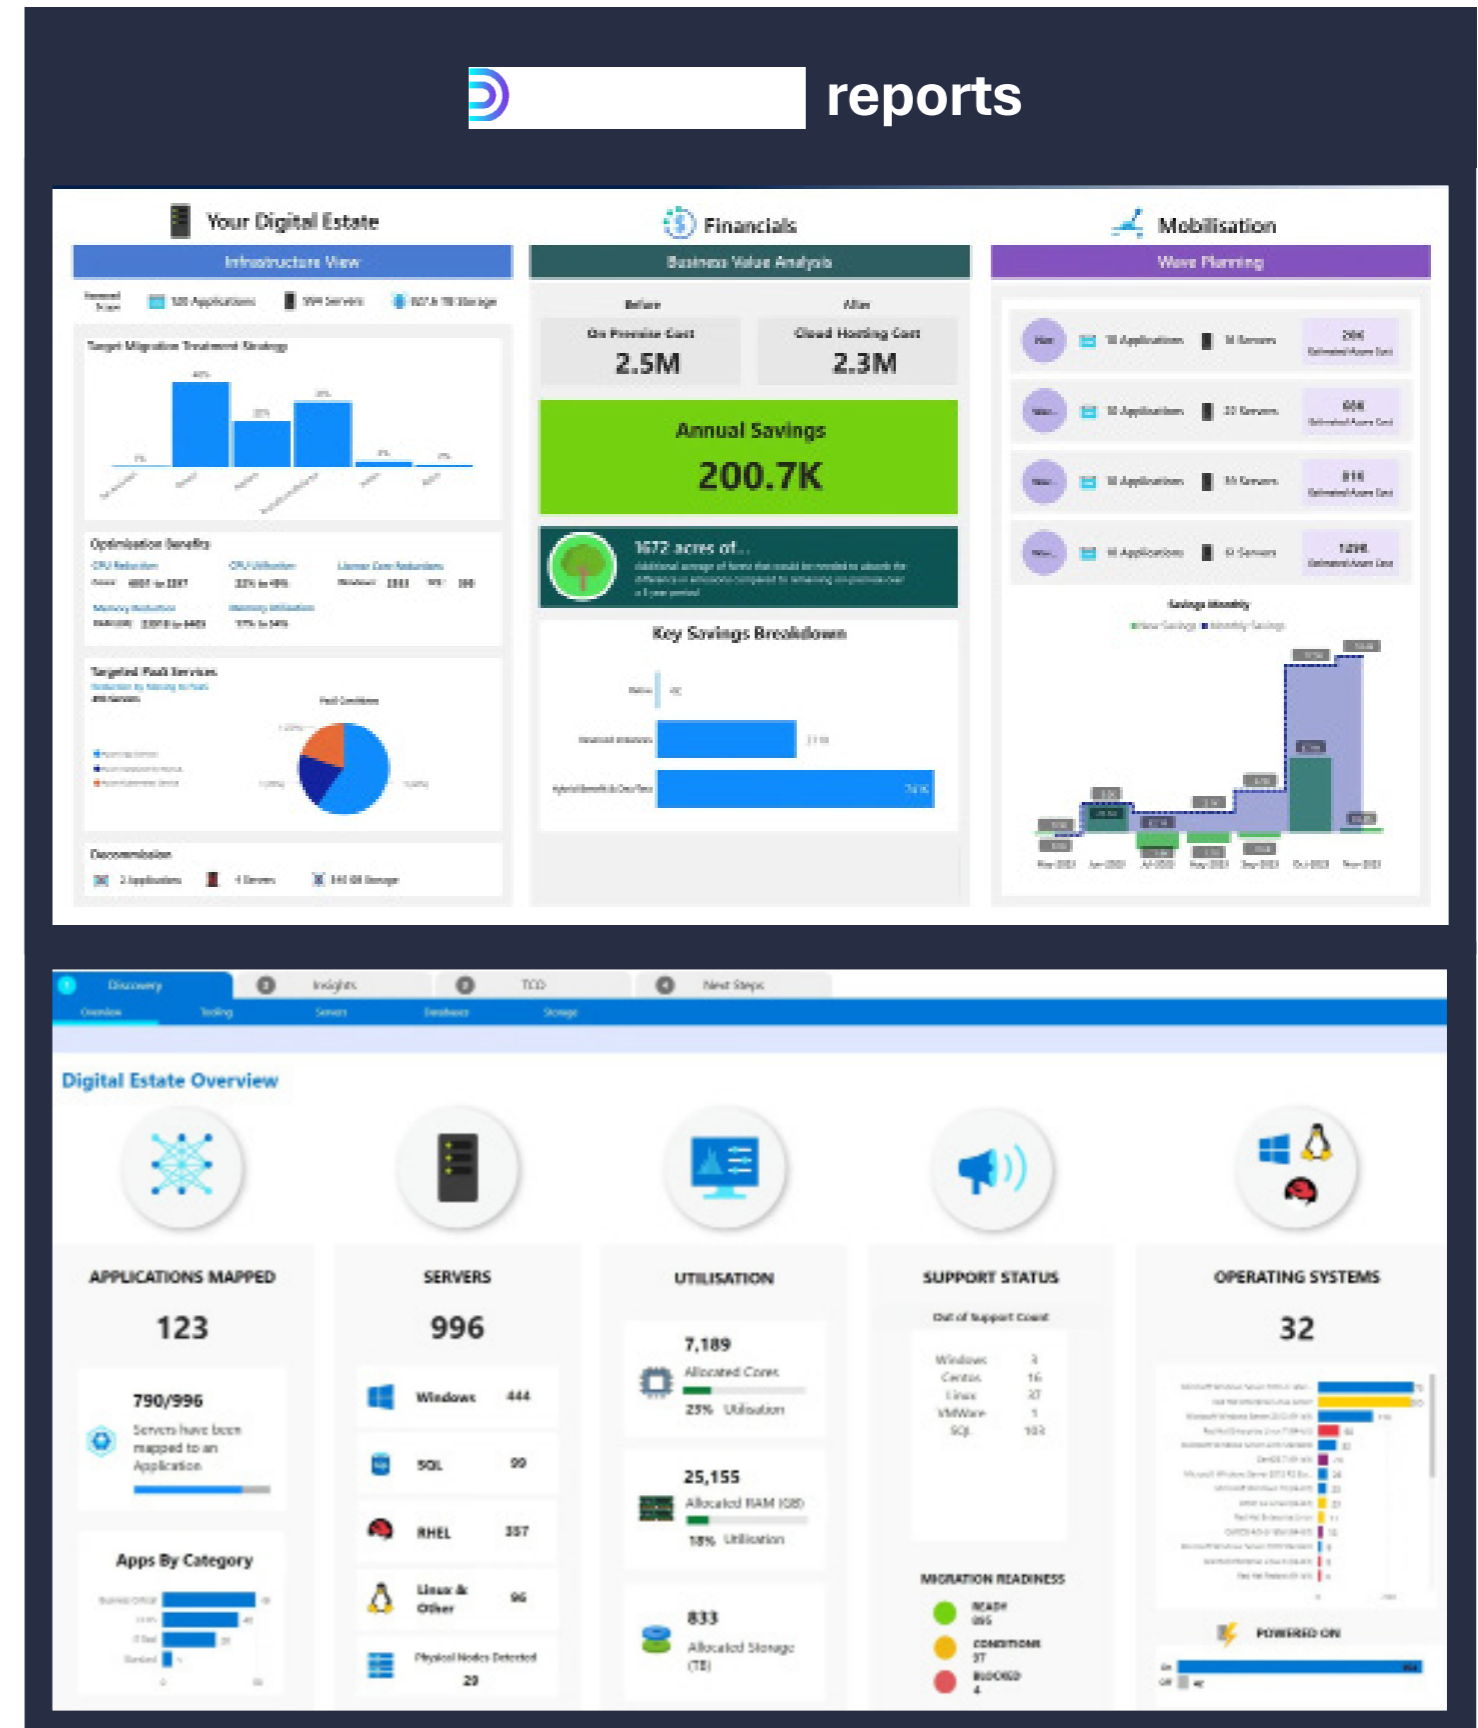

View of risks, including EOL operating systems, unsupported platforms, ESU needs, patching gaps and dependency issues.

04. Modernisation guidance.

Recommendations for modernising databases and applications, including Azure SQL suitability, PaaS and legacy removal.

05. Hardware lifecycle overview.

Identification of ageing, under-utilised or end-of-life hardware to support investment planning and migration wave timing.

Infrastructure assessment pricing.

Two distinct services. Pick the one that matches your current stage.

Microsoft funding available via eligibility check.

Infrastructure assessment

€3,000

- ✓ 4 core assessment modules
- ✓ Dr Migrate platform analysis
- ✓ 6 detailed deliverables
- ✓ Azure MVP review
- ✓ AI landing zone evaluation
- ✓ 10-day delivery timeline

[Book assessment](#)

AI-ready

AI landing zone

€5,000

- ✓ Enterprise Azure landing zone
- ✓ AI-ready workload configuration
- ✓ Cost management & monitoring setup
- ✓ Governance & security framework
- ✓ Network & identity configuration
- ✓ Ready for immediate migration & AI workloads

[Book AI landing zone](#)

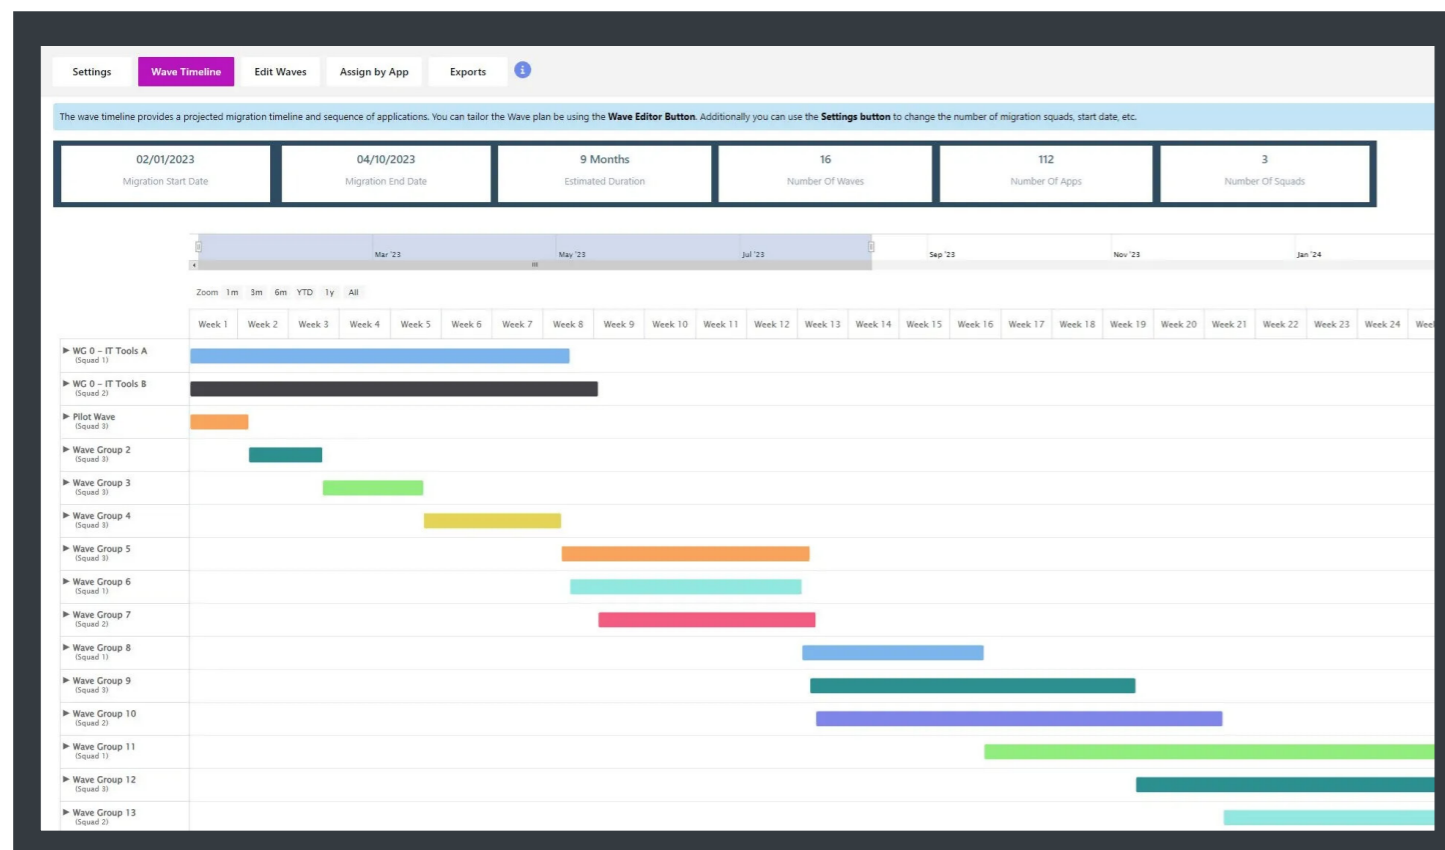

Why Azure projects **with eir business?**

Post-assessment migration planning.

Beyond the assessment outputs, we collaborate directly with your IT, architecture and leadership teams to:

- Prioritise workloads based on value, risk and urgency
- Choose the right migration approach for each system
- Define migration waves aligned to business operations
- Establish a realistic timeline and resource model
- Provide a clear, actionable strategy for moving to Azure

This ensures the final strategy is not just technically sound, but operationally feasible, financially grounded, and aligned to your business priorities.

Recognised Azure service excellence.

As a Microsoft Tier 1 CSP and Azure Expert MSP, we bring:

- Proven cloud economics experience with FinOps at the core
- Deep Azure landing zone, migration and security expertise
- Irish-based delivery with enterprise and public-sector maturity
- Optional managed services to sustain FinOps and optimisation post-migration

Our assessment combines AI intelligence, FinOps discipline, and Azure expertise into one service — giving you clarity, confidence and a financially-sound path to Azure.
