

Hybrid meeting by EXAPROBE

EXAPROBE's Hybrid Meetings offer helps customers realize the full potential of Teams Meetings, by meeting smarter, staying focused, and achieving more.

Our offer spans across several steps of your Teams Meetings journey: we assess your current network and your current meeting room, develop your device strategy, define your migration planning, design solution according to your environment and plan your next steps to optimize deployment; then we configure your Meetings policies, enable Audio Conferencing, deploy Microsoft Teams Rooms and deploy cloud video interoperability, to ensure you have everything set for usage; then we offer training, adoption and change management services to ensure your organization realizes the full potential of Teams Meetings; finally, we offer managed services, such as device management and network monitoring, ensuring the best possible experience for you.

Why EXAPROBE

Our expertise in both Microsoft Teams and audio-visual solutions help customers to successfully transition to Teams meeting and propose solutions for every workspace, regardless of their complexity.
