

Overview

Power Platform COE: 2-week Implementation

CONCEPT

Enabling governance and adoption of the Power Platform

Why is governance important in the user of the Microsoft Power Platform?

Innovation

According to Gartner®, "By 2026, low-code development tools will account for 75 percent of new application development."

IT Challenges

It is challenging for IT Professionals to manage security and deliver customer expectations timely

Compliance

Lack of IT governance when building low-code business solutions put organisations compliance to standards and regulations at risk

How can Exco Partners help?

We blend technical expertise and best practice through an implementation of the Microsoft Power Platform COE, to:

Establish monitoring and automation necessary to support ongoing analysis of Power Platform usage and pain points.

Analyse licensing costs across the business, to optimise costs of solving business problems.

Develop an approach to maintain governance and compliance at scale – allowing more benefit to the business.

Drive innovation and improvement, and bring together like-minded people in your organisation
