

Free On-Prem to Azure Migration Readiness Assessment

A no-cost, no-downtime review of your on-premises infrastructure – identify performance bottlenecks, uncover hidden costs, reduce security risks, and get a clear, step-by-step roadmap for a seamless, disruption-free move to Microsoft Azure with scalable resources, predictable costs, and enterprise-grade protection.

Why Executech?

We've guided countless organizations from outdated, on-premises systems to secure, scalable cloud environments in Azure — without the disruption they feared. Our team knows how to balance performance, cost, and security so you can migrate with confidence and a clear ROI.

What's Included:

- **Infrastructure Review** – Evaluate your current on-premises hardware and workloads.
- **Cost & Performance Analysis** – Compare total cost of ownership between on-prem and Azure.
- **Risk Assessment** – Identify vulnerabilities, downtime risks, and compliance gaps.
- **Custom Migration Roadmap** – Step-by-step plan tailored to your business goals.

Who This Is For:

IT Managers, Ops Directors, and CFOs at companies with:

- Aging servers or expensive co-location
- Growth and scalability needs (20–200 employees)
- Security or compliance concerns

Why Security Matters:

The Risks of Staying On-Prem

- Rising maintenance costs from legacy servers and hardware
- Security and compliance gaps from outdated systems
- Inflexible infrastructure that can't scale with growth
- Unpredictable costs from piecing together co-lo, backups, and firewalls

With Microsoft Azure

Enjoy a scalable, predictable-cost platform with enterprise-grade security built in.
