

Free G Suite to M365 Migration Readiness

A no-cost, no-downtime review of your Google Workspace security – uncover hidden risks, strengthen protection, improve compliance, and get a clear, step-by-step roadmap for a seamless, disruption-free move to Microsoft 365 with stronger collaboration and built-in security.

Why Executech?

We've helped hundreds of businesses move to the cloud with zero downtime and stronger security. Our Microsoft experts know the compliance needs of your industry and deliver migrations that are smooth, secure, and built for long-term success.

What's Included:

- **Security Assessment** – Identify vulnerabilities in your current Google Workspace setup.
- **Compliance Review** – Check alignment with HIPAA, CJIS, FedRAMP, and other regulations.
- **Migration Readiness Plan** – Understand the steps, timeline, and tools for a smooth transition to Microsoft 365.
- **Risk Report** – A clear, jargon-free summary you can share with leadership.

Who This Is For:

- Healthcare
- Financial services
- Government contracting
- Any business concerned about phishing, ransomware, or data loss

Why Security Matters:

Top Risks in Google Workspace (G Suite)

- No built-in endpoint protection (M365 includes Microsoft Defender)
- Limited ransomware recovery without paid Vault or third-party backups
- Weaker compliance capabilities for regulated industries
- No unified threat protection across email, identity, and files
- Fragmented admin tools make it harder to enforce policies and detect breaches

With Microsoft 365

A single, secure ecosystem protecting identity, email, files, and devices — all natively integrated
